Zoecon 9204 Fogger kills houseflies, gnats, ticks, cockroaches, carpet beetles, ants, spiders, flying moths, clothes moths, mosquitoes, silverfish, sawtoothed grain beetles, rice weevils, pill bugs, crickets, confused flour beetles, wasps, hornets, and palmetto bugs. 9204 Fogger contains GENCOR Insect Growth Regulator, an ingredient that inhibits roaches' natural ability to reproduce, thereby eliminating future generations, and an ingredient that kills existing roaches. This formula reaches roaches through cracks and crevices to kill them where they hide. One to two weeks after application, you will begin to see roaches with crinkled wings - showing the effects of GENCOR. These roaches cannot reproduce. Immature roaches are prevented from developing into reproductive adults, thereby effectively breaking the roach life cycle. Zoecon 9204 Fogger should be applied every 4 months to maintain continuous protection.

Zoecon 9024 Fogger is also effective in controlling flea populations. It effectively breaks the flea life cycle by preventing their development into adults. Leaves no bad smell, no sticky mess and used as directed, does not stain furnishings.
