ACCEPTED

SEP 22 1997

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 2724-471

2014

READ ENTIRE LABEL BEFORE EACH USE
USE ONLY ON [DOGS][PUPPIES]

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. Buckle collar around dog's neck. [Thread flat end of the collar through buckle hole and tighten as necessary, so that at least two ridges are covered by the buckle. Since the plastic buckle is molded into the collar, the possibility of neck irritation and buckle failure is reduced.] Collar should fit snug enough to prevent placement of the dog's leg or lower jaw through the collar, yet loose enough to be rotated about the neck - to prevent irritation. Generally, if used on large dogs, two or three fingers should fit between the collar and dog's neck.
2. Leave 2 - 3 extra inches on the collar for adjustment, cut off excess length and dispose in trash.
3. As with any collar, initially observe neck area every few days for irritation. Remove if irritation occurs. [To release the collar, squeeze buckle between thumb and finger and pull sharply.]
4. Check periodically and adjust fit if necessary, especially when puppies are rapidly growing. Do not use on [dogs] [puppies] under 12 weeks of age.
5. May be used in addition to regular collar.

STORAGE and DISPOSAL: Store in original unopened package, away from children. Do not reuse package or used collar. Wrap and put in trash.

WHAT TO EXPECT:

For Fleas:

1. This [brandname] collar is specifically designed to kill both adult fleas and flea eggs before they hatch.
2. This collar contains PRECOR [vIGRen] IGR, an insect growth regulator that kills flea eggs and prevents flea eggs from hatching.
3. This collar will begin to kill fleas and flea eggs as soon as it is placed on the pet.
4. Full protection against fleas will be achieved within a couple of days, providing continuous protection for 11 months.
5. Replace collar every 11 months to continuously prevent flea infestations in your home.
6. New adult fleas that may appear on your pet will also be killed while the collar is worn.

For Ticks:

1. Ticks are tougher to kill than fleas and are killed more slowly.
2. Full protection against all stages of ticks will be achieved within a couple of days, providing continuous protection for 7 months.
3. Adult ticks will be killed over the entire pet; dead ticks will fall off or may be easily removed.
4. Replace collar every 7 months for continuous protection from ticks.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS-CAUTION:

Humans: Do not open protective pouch until ready to use. Do not allow children to handle this collar. May cause eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling collar.

Animals: Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or animals on medication. Do not use on [puppies][dogs] under 12 weeks of age. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur remove collar and bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. This product contains a cholinesterase inhibitor. Do not use this product on animals simultaneously or within 30 days before or after treatment with or exposure to cholinesterase-inhibiting drugs, pesticides, or chemicals. However, flea and tick collars may be immediately replaced.

FIRST AID: Remove collar if symptoms of cholinesterase inhibition (which may include salivation, vomiting, and/or diarrhea) occur. Note to physician/veterinarian: Atropine is antidotal only if symptoms of cholinesterase inhibition are present.
