RF 9707 Aerosol

- Contains [With] GENTROL® [ZIGRON®] Insect Growth Regulator [IGR]
- Insect growth regulator for pest control
- Controls roaches and stored product pests
- Labeled for use in food areas of food handling and manufacturing establishments
- Prevents the buildup of infestations
- Breaks the insect life cycle
- Long term control
- Non-repellent and compatible in baiting programs
- Treats up to [#] 900 square feet
- Dissipating foam assures complete coverage
- Dissipating foam reduces the chance for missed areas

ACTIVE INGREDIENT:

(S)-Hydroprene (CAS #65733-18-8) 0.36%

OTHER INGREDIENTS*: 99.64%

TOTAL 100.0%

* Contains petroleum distillates

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel for additional precautionary statements

EPA Reg. No. 2724-XXX

NET CONTENTS:

EPA Est. No.

ACCEPTED

MAR 22 1999

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 2724-484

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID: **If on skin:** Wash thoroughly with plenty of soap and water. Get medical attention. **If in eyes:** Flush eyes with plenty of water. If irritation persists, call a physician. **Note to Physician:** Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

PHYSICAL OR CHEMICAL HAZARDS: Do not apply this product in or on electrical portion of equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

RF 9707 Aerosol contains GENTROL® [ZIGRON®] Insect Growth Regulator (IGR). The IGR disrupts the normal development of immature cockroaches and stored product pests (examples of these pests include: Indian meal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, lesser grain borers, merchant grain beetles, sawtooth grain beetles, warehouse beetles, cigarette beetles, and dermestid beetles). Roaches and stored product pests exposed to RF-9707 Aerosol will become adults incapable of reproducing. RF 9707 Aerosol also disrupts the normal life cycle of stored product pests; thus, killing these insects during the pupal stage. In both cases, the cycle of an infestation ends. RF 9707 Aerosol is intended for use in, but not limited to: apartment buildings, bakeries, bottling facilities, breweries, boiler rooms, cafeterias, candy plants, grocery stores, day care centers, hospitals, residential homes, office buildings, kitchens, laboratories, cereal processing facilities, manufacturing plants, mausoleums, meat and produce canneries, nursing homes, restaurants, schools, locker rooms, stores, taverns, warehouses, pet stores, as well as various modes of transportation, such as aircraft, buses, trucks, trailers, rail cars, and marine vessels.

RF 9707 Aerosol is intended for use as a general surface spray, and spot and crack and crevice application.

Prior to using in commercial or residential [household] food areas, please refer to the Food Handling Establishment Applications section of the label. The preparations prior to treatment and the clean-up after application described are also to be followed for residential [household] use.

RF 9707 Aerosol is non-repellent and should be considered an important component in a cockroach baiting program. Baits are an important part of a total cockroach control program but are not a complete solution. RF 9707 Aerosol can reach those nymphs that fail to forage to baits and the IGR stimulates egg-bearing females to leave the harborage and feed.

INSTRUCTIONS FOR USE: Shake well before use. RF 9707 Aerosol is a ready-to-use pressurized spray that may be applied to a variety of locations and surfaces to control pests. RF 9707 Aerosol may be applied as a general surface spray, spot, or crack and crevice application. The supplied extension tube can be used for crack and crevice applications. To apply as a general surface or spot application, hold can 10" to 12" away from surface to be treated. Use a sweeping motion over the surface to be treated for complete coverage. This product is a dissipating foam when applied. An oily residue may be apparent in heavy applications. The visibility of the dissipating foam eliminates the possibilities of missed areas. For crack and crevice applications, use the supplied extension tube and apply to wall voids, hollow table legs, tube iron, gondola frames, voids, and supports. RF 9707 Aerosol is generally non-staining, but in questionable situations, apply a small amount in an inconspicuous location. RF 9707 Aerosol may be applied once a month for continuous protection or more often, if conditions warrant.

GENERAL SURFACE APPLICATION: Apply the RF 9707 Aerosol at a rate of 12 ounces per 900 sq ft of surface area. Applications can be made to areas such as: walls, floors, ceilings, attics, basements, gondolas, and shelving. **NOTE:** Prior to treating around air ducts, shut off ventilation system. Air-handling systems may be turned on immediately after application.

SPOT AND CRACK AND CREVICE APPLICATIONS: Apply RF 9707 Aerosol as a crack and crevice application using the supplied extension tube. Applications may be made directly to areas such as: wall voids, pipe chases, crevices, and false ceilings. Spot treatments can be made to areas such as: storage areas, closets, around water pipes, doors, windows, and behind and under appliances/equipment.

WAREHOUSES (Non-Food): RF 9707 Aerosol may be applied as a general surface, spot, or crack and crevice treatment in non-food storage warehouses. Apply to all areas that may harbor pests, including under and between pallets.

FOOD HANDLING ESTABLISHMENT APPLICATIONS:

RF 9707 Aerosol may be applied as a general surface spray, spot, or crack and crevice treatment in both food and non-food areas of food handling establishments. These establishments are defined as: places other than private residences where exposed food is held, prepared, processed, or served. It also includes areas where food items are: received, prepared, packaged, and stored, as well as enclosed food processing systems (mills, dairies, etc.).

SURFACE SPRAY APPLICATION:

Do not apply directly to food products.

GENERAL AREA TREATMENTS: Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e. equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

PARTIAL AREA TREATMENTS: RF 9707 Aerosol can be applied to partial areas of food handling establishments in cases of small or localized infestations. For partial area treatments, a perimeter of at least 6 feet must be established [6 feet in all directions from the treated area], from all food handling surfaces.

SPOT AND CRACK AND CREVICE APPLICATIONS:

Prior to application, remove or cover all food items in area to be treated. Do not apply directly to food or food-handling surfaces.

PANTRY/CABINETS, SMALL FOOD STORAGE AREAS:

Apply as a surface spray, crack and crevice spray, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all food containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Dispose of any infested food packages or materials.

WAREHOUSES (Food): RF 9707 Aerosol may be applied as a general surface spray, spot, or crack and crevice treatment in warehouses where packaged food items are stored in such a way that direct contact with the foodstuff is not anticipated.

STORAGE and DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

Storage: Store in a cool area away from children. Do not reuse empty container. **Pesticide**

Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Disposal:** Sizes \leq 1 gallon: Wrap container and put in trash collection. Sizes $>$ 1 gallon: Empty container may be offered for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
