USE ONLY ON CATS OR KITTENS OVER 12 WEEKS OF AGE

(Specially formulated for cats) For use on cats only

INTRODUCTION:

RF 9804 (contains) is a topically applied [long-lasting] insect growth regulator (IGR)(product) specifically formulated for cats and kittens to prevent and control flea infestations (kill fleas before they hatch)(which prevents flea eggs from maturing into adults). Its active ingredient, S-Methoprene, an IGR prevents adult female fleas from laying viable eggs. A single application of RF 9804 will last for up to 28 days (1 month)(4 weeks). Each package contains enough product for (three or four)(3 or 4) monthly applications (90 or 120 days of protection). RF 9804 Topical provides relief from flea infestations for one month by controlling and preventing flea eggs on your cat and kitten. Adult fleas can live on your pet while producing vast numbers of eggs which drop off your pet and develop in the surrounding environment. Normal insecticides will not kill the flea eggs, but RF 9804 Topical (is designed to) kill(s) flea eggs, thereby breaking the flea life cycle.

After application, through its natural movement, your cat's skin and hair oils (disperse) carry RF 9804 Topical over the pet's body for protection against flea eggs. Once fleas are evident on your pet, there is already an infestation of their preadult stages in your home. To kill existing adult flea populations, you may need to treat the home, pet's bed, and yard with traditional flea products approved for use on pets, around the home, or in your yard (such as home sprays, foggers, and/or yard and kennel spray). RF 9804 Topical can be used in conjunction with the entire ZODIAC product line for cats. As with all flea products, they are (RF 9804 Topical is) most effective when used as part of a total program aimed at reducing fleas in the cat's environment. Be sure to treat the animal's bedding and surroundings with [Brand Name] flea and tick products registered for these uses, such as the ZODIAC® line.

(ZODIAC products are designed to complement each other in an integrated program for flea and tick management. To assure proper treatment, we recommend use of only ZODIAC products. For complete efficacy, treat all pets in the household.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product contains (three or four)(3 or 4) monthly doses (one monthly dose), each (1 cc).

DO NOT USE ON OTHER ANIMALS. Remove one applicator tube from package. Holding the applicator tube in an upright position, simply press cap down to break the seal of tube. (Hold bottom of tube with one hand. With other hand, snap cap off.) Remove cap carefully. Position the tip of the tube on the cat's back between the shoulder blades and squeeze out the (entire) contents of the tube onto the cat's skin. Repeat every month.

ALTERNATE PACKAGING DIRECTIONS (A)

Use ONLY on cats or kittens over 12 weeks of age. [Bend at perforation and tear off 1st month's applicator.] Hold [applicator] upright and snap tip back, away from face and body. Prior to application of the product, gently lift the cat's (kitten's) haircoat on the back of the neck at the base of the skull, position the tip of the [applicator] tube on the cat's exposed skin and squeeze out the (entire) contents of the [applicator] tube onto the cat's skin. Because of the bitter taste of the product, some cats may salivate if they are able to lick the product when grooming right after application. This effect is temporary and is not harmful. Repeat application once monthly.

ALTERNATE PACKAGING DIRECTIONS (B)

Use ONLY on cats or kittens over 12 weeks of age. Remove one applicator tube from package and hold in an upright position. Simply twist (press) cap (down) to break the seal of tube. (Hold bottom of tube with one hand. With other hand, snap cap off.) Remove cap carefully. Prior to application of the product, gently lift the cat's (kitten's) haircoat on the back of the neck at the base of the skull, position the tip of the tube on the cat's exposed skin and squeeze out the (entire) contents of the tube onto the cat's skin. Because of the bitter taste of the product, some cats may salivate if they are able to lick the product when grooming right after application. This effect is temporary and is not harmful. Repeat application once monthly.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. **Storage:** Store in a cool, dry place. **Disposal: If Empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS - CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

HAZARDS TO DOMESTIC ANIMALS

CAUTION: Do not use on kittens less than 12 weeks old. Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivity may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.
