Dr. James McFadden  
Regulatory Project Manager  
Wellmark International  
1501 E. Woodfield Road  
Suite 200W  
Schaumburg, IL 60173

Dear Dr. McFadden:

Subject: Label Amendment (New Application Method) to Add Fire Ants  
Product Name: Crawling Insect Killer I  
EPA Registration No. 2724-667  
Submissions dated March 31 and October 30, 2009

The label amendment above, submitted in connection with the Federal Insecticide, Rodenticide, and Fungicide Act, as amended, is acceptable provided you:

1. On the final printed label you must include graphics to show how to use the applicator to be sold for use with this product.

A stamped copy of the label and the product performance data evaluation review are enclosed for your records. Submit two copy of your final printed labeling before releasing the product shipment. If you have any questions, please contact Kevin Sweeney at (703)-305-5063 or by email at [sweeney.kevin@epa.gov](mailto:sweeney.kevin@epa.gov)

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Gebken".

Richard Gebken  
Product Manager  
Registration Division (7505P)  
Insecticide Branch

Enclosure

# CRAWLING INSECT KILLER I

For use in homes, apartment buildings, and the non-food/feed areas of hotels, stores, warehouses, office buildings, schools, nursing homes, hospitals, industrial buildings, building foundations, vessels, rail cars, trucks, trailers, and aircraft (cargo areas only)  
Use for fire ants on lawns, landscaped areas, golf courses, and other non-cropland areas: (airports, roadsides, cemeteries, commercial grounds, parks, school grounds, picnic grounds, athletic fields and other recreational areas).

Contains Synergized Etofenprox and Tetramethrin  
Provides Quick Killing Action and Residual Control  
Economical Do-It-Yourself Pest Control  
Use Indoors and Outdoors  
Kills Fleas - Roaches - Ants  
Kills on Contact - Kills Fast  
Kills Hidden Bugs  
Kills Bugs You See and Even the Ones You Don't See  
A broad-spectrum insecticide highly effective against Ants, Carpet Beetles, Cockroaches, Crickets, Earwigs, Firebrats, Fleas, Flour Beetles, Grain Beetles, Pillbugs, Silverfish, Sowbugs, Spiders, Fire Ants, and many other crawling insects  
No Oily Residue - Low Odor  
Recommended for Use with [Brand Name's] Aerosol Applicator

**ACCEPTED  
with COMMENTS  
In EPA Letter Dated**  
APR 22 2010  
**Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under EPA Reg. No.**  
2724-667

**ACTIVE INGREDIENTS:**

Tetramethrin (CAS #7696-12-0).....	0.2%
Etofenprox (CAS #80844-07-1).....	1.0%
Piperonyl Butoxide, Technical* .....	1.0%
<b>OTHER INGREDIENTS**</b> .....	<b>97.8%</b>
<b>Total</b> .....	<b>100.0%</b>

\*Equivalent to min 0.8% (butylcarbityl)(6-propylpiperonyl) ether and 0.2% related compounds  
\*\*Contains petroleum distillates

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

**See Side Panel For Additional Precautions**

NET CONTENTS:

EPA REG. NO. 2724-667  
EPA EST. NO.

**PRECAUTIONARY STATEMENTS  
HAZARD TO HUMANS & DOMESTIC ANIMALS  
CAUTION**

Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling. If clothing becomes contaminated, remove and launder before use.

<b>FIRST AID</b>	
<b>If in eyes:</b>	<ul style="list-style-type: none"> <li>•Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>•Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>•Call a poison control center or doctor for treatment advice.</li> </ul>
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.	

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

**PHYSICAL OR CHEMICAL HAZARDS**

Contents under pressure. Keep away from heat, sparks, and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use this product in or on electrical equipment due to the possibility of shock hazard.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THE ENTIRE LABEL PRIOR TO USE. USE STRICTLY IN ACCORDANCE WITH ALL LABEL PRECAUTIONS AND DIRECTIONS.**

**GENERAL INFORMATION:** Etofenprox Crawling Insect Killer I provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include: apartment buildings, homes, hospitals, and the non-food/feed areas of hotels, industrial buildings, laboratories, mausoleums, motels, nursing homes, private residences, schools, stores, utilities warehouses, and in non-food areas of restaurants, food manufacturing, processing, and servicing establishments, and on: vessels, rail cars, aircraft (cargo areas only), buses, trucks and trailers.

**INDOORS:**

**Note:** Do not apply to classrooms when in use. Do not use in aircraft cabins. Do not apply to patient rooms in hospitals and nursing homes while occupied. For use in the non-food and non-feed areas of food and feed handling establishments. Non-food and non-feed areas of food and feed establishments are: garbage rooms, lavatories, floor drains (to sewer entries and vestibules), offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning and bottling). Remove food from food serving areas of commercial establishments prior to treatment. Wash all exposed food serving/handling surfaces thoroughly with potable water following treatment and before use. Do not use in food or feed areas of food or feed handling establishments, restaurants or other areas where food or feed is commercially prepared or processed. Do not use in serving areas while food is exposed or the facility is in operation. Serving areas are areas where prepared foods are served (dining rooms but excluding areas where foods may be prepared or held). In homes, remove all food and cooking utensils. Cover all food handling surfaces and wash thoroughly after treatment and before use. Repeated exposure to etofenprox can cause skin irritation.

Hold container upright with nozzle away from you. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 1 second to treat approximately 1 linear foot of baseboard area).

**Repeat treatments to infested areas as necessary at intervals of 14 days or greater.**

Cockroaches, Ants, Crickets, Earwigs, Firebrats, Fleas, Silverfish, Spiders, and Sowbugs: Apply as a spot or crack and crevice treatment. Apply thoroughly to areas where these pests crawl and hide, especially in cracks and crevices, and hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and in similar areas.

Ants: Spray around ant trails, doors and windows and other places where ants enter premises. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris.

Fleas in Buildings: Apply to infested areas (pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture) and other areas where these pests may be present. Remove old pet bedding and replace with clean fresh bedding after treatment of pet areas. Do not apply directly on animals.

Spiders: Apply along and behind baseboards, to window and doorframes, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Earwigs, Mole Crickets, Pillbugs, and Sowbugs: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

Pantry Pests - Exposed Stages of Saw-toothed Grain Beetles, Flour Beetles (Red and Confused), and Cigarette Beetles: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

**OUTDOORS:**

Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm. Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply when windy. Do not water the treated area(s) to the point of run-off or apply when raining or when rain is expected that day.

**PESTS ON OUTSIDE SURFACES OF BUILDINGS** - For control of building infestation due to Ants, Crickets, Earwigs, and Sowbugs (Pillbugs): Spray foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary but not more than once per week.

**Mound Building Ants, including Imported Fire Ants:**

[Recommended for Use with [Brand Name's] Aerosol Applicator]

Hold can upright when applying product. To treat mounds, use the [Brand Name] Soil Injector. Note: Since fire ants may climb up the applicator shaft during use, users should be aware that there is potential for fire ant bites to occur with contact. Before inserting can into soil applicator, use can to spray ants on the surface of the mound for about 10 seconds at a distance of about 18 inches from the surface.

To insert Aerosol can into [Brand Name] Applicator:

- 1 Remove plastic spray tip from aerosol can (if applicable)
- 2 Place base of aerosol can against applicator spring [graphic]
- 3 Use can to compress applicator spring [graphic]
- 4 Push can into position; insuring can is seated in applicator [graphic]

Maximize distribution of insecticide [underground] by inserting the full-length of the injector into the mound if possible. Inject the mound at 3-6 sites at a rate of 15 seconds per site. One can will treat about three mounds. For very large mounds, (over 16" diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one injection site in the center. Treat a maximum of 7 mounds per 5000 ft<sup>2</sup> at any one time. After initial treatment, wait 1 week before retreatment, if necessary. Make a maximum of 10 applications (at minimum 1-week intervals) at any location per year. Treat new mounds as they appear, but do not treat one location more than 10 times per year.

To Remove Aerosol can from [Brand Name] Applicator

- 1. Use can to compress applicator spring
- 2. Remove can from applicator

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**STORAGE:** Do not store near heat or open flame. Store in cool dry area away from children.

**DISPOSAL:** Do Not Puncture or Incinerate!

**If empty:** Place in trash or offer for recycling if available.

**If partly filled:** Call your local solid waste agency for disposal instructions.

**WARRANTY:** Seller warrants that this product complies with the specifications expressed in this label. To the extent consistent with applicable law, Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. To the extent consistent with applicable law, Seller's liability or default, breach or failure under this label shall be limited to the amount of the purchase price. To the extent consistent with applicable law, Seller shall have no liability for consequential damages.

Federal regulations prohibit CFC propellants in aerosols. Contains no CFC's which deplete the ozone layer (icon)

For additional information, call [phone number]. Money back guarantee. If this product fails to kill the listed insects when used as directed, mail container to [company name] for full refund.
