OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

James McFadden
Wellmark International
1501 East Woodfield Road, Suite 200 West
Schaumburg, IL 60173

Subject: Amended Reregistration Label
Product Name: Crawling Insect Killer I
EPA Registration Number: 2724-667
EPA Decision Numbers: 436000 and 410763

Dear Mr. McFadden:

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the reregistration of the above referenced product in connection with the tetramethrin and piperonyl butoxide (PBO) REDs, and has concluded that your submission is acceptable.

NOTE: This product is **not** being reregistered under sections 3(c)5 and 4(g) of FIFRA at this time.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on non-refillable containers. The code may appear either on the label or durably marked on the container itself, and can be added by non-notification per PRN 98-10.

Please note that the record for this product currently contains the Confidential Statements of Formulation (CSFs) listed below. Any previously dated CSFs are superseded.

- Basic CSF, dated 7/29/11
- Alternate CSF, dated 7/29/11

A copy of your label stamped "Accepted" is enclosed along with copies of the acute toxicity and product chemistry reviews completed for the subject product. Products shipped

2/19

after 12 months from the date of this amendment or the next printing of the label whichever occurs first, must bear the new revised label. Your release for shipment of the product bearing the amended label constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e).

If you have any questions about this letter, please contact Jennifer Urbanski at 703-347-0156 or urbanski.jennifer@epa.gov.

Sincerely,

Richard J. Gebken
Product Manager (10)
Insecticide Branch
Registration Division (7504P)

*Enclosures: Label stamped "Accepted,"
Acute Toxicity Review, dated 6/2/10
Product Chemistry Reviews, dated 11/3/10 and 9/6/11*

ACCEPTED

APR 25 2012

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under:

SUBLABEL A - OCCUPATIONAL LABEL

EPA Reg. No: 2724-667

CRAWLING INSECT KILLER I

For use in homes, apartment buildings, and the non-food/feed areas of hotels, stores, warehouses, office buildings, schools, nursing homes, hospitals, industrial buildings, building foundations, vessels, rail cars, trucks, trailers, and aircraft (cargo areas only)
Use for fire ants on lawns, landscaped areas, golf courses, and other non-cropland areas: airports, roadsides, cemeteries, commercial grounds, parks, school grounds, picnic grounds, athletic fields and other recreational areas.

Contains Synergized Etofenprox and Tetramethrin
Provides Quick Killing Action and Residual Control
Economical Do-It-Yourself Pest Control
Use Indoors and Outdoors
Kills Fleas - Roaches - Ants
Kills on Contact - Kills Fast
Kills Hidden Bugs
Kills Bugs You See and Even the Ones You Don't See
A broad-spectrum insecticide highly effective against Ants, Carpet Beetles, Cockroaches, Crickets, Earwigs, Firebrats, Fleas, Flour Beetles, Grain Beetles, Pillbugs, Silverfish, Sowbugs, Spiders, Fire Ants, and many other listed crawling insects
No Oily Residue - Low Odor
Recommended for Use with [Brand Name's] Aerosol Applicator

ACTIVE INGREDIENTS:

Tetramethrin (CAS #7696-12-0).....	0.2%
Etofenprox (CAS #80844-07-1).....	1.0%
Piperonyl Butoxide* (CAS #51-03-6).....	1.0%
OTHER INGREDIENTS**:	97.8%
Total	100.0%

*(butylcarbityl)(6-propylpiperonyl) ether and related compounds
**Contains petroleum distillates

KEEP OUT OF REACH OF CHILDREN
CAUTION

See Side Panel For Additional Precautions

NET CONTENTS:

EPA REG. NO. 2724-667
EPA EST. NO.

**PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS & DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Repeated exposure to etofenprox can cause skin irritation.

Personal Protective Equipment (PPE):

Applicators must wear

- Long-sleeve shirt,
- Long pants,
- Shoes and socks

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them.

User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID

If swallowed	<ul style="list-style-type: none"> • Immediately call a poison control center or doctor. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give any liquid to the person. • Do not give anything by mouth to an unconscious person.
If in eyes:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
<p>Note to Physician: Contains petroleum distillate. Vomiting may cause aspiration pneumonia.</p> <p>Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-800-xxx-xxxx for emergency medical treatment information.</p>	

ENVIRONMENTAL HAZARDS

This product is extremely toxic to aquatic organisms, including fish and invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. This product may contaminate water through runoff. This product has a potential for runoff for several weeks after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

5/19

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or inc nerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THE ENTIRE LABEL PRIOR TO USE. USE STRICTLY IN ACCORDANCE WITH ALL LABEL PRECAUTIONS AND DIRECTIONS.

USE RESTRICTIONS

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Do not enter or allow others to enter until sprays have dried.

Do not wet articles to point of runoff or drip.

Do not use treated article until spray has dried.

Do not apply when food is present.

Remove or cover dishes, utensils, food processing equipment, and food preparation surfaces, or wash them before use.

Except when applying to sewers or drains as instructed on this label, do not apply directly into sewers or drains, or to any area like a gutter where drainage to storm sewers, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

Do not use in aircraft cabins.

Do not make applications during rain.

All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

Treatment to soil or vegetation around structures; and applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications only.

To apply at the maximum rate, spray for about 25 seconds to cover a space of 100 sq ft (10' x 10').

USE INFORMATION: Etofenprox Crawling Insect Killer I provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport.

Permitted areas of use include: apartment buildings, homes, hospitals, and the non-food/feed areas of hotels, industrial buildings, laboratories, mausoleums, motels, nursing homes, private residences, schools, stores, utilities warehouses, and in non-food areas of restaurants, food manufacturing, processing, and servicing establishments, and on: vessels, rail cars, aircraft (cargo areas only), buses, trucks and trailers.

INDOORS:

Do not apply to classrooms when in use. Do not apply to patient rooms in hospitals and nursing homes while occupied. For use in the non-food and non-feed areas of food and feed handling establishments. Non-food and non-feed areas of food and feed establishments are: garbage rooms, lavatories, floor drains (to sewer entries and vestibules), offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning and bottling). Do not use in food or feed areas of food or feed handling establishments, restaurants or other areas where food or feed is commercially prepared or processed. Do not use in serving areas while food is exposed or the facility is in operation. Serving areas are areas where prepared foods are served, dining rooms but excluding areas where foods may be prepared or held.

Remove pets, birds, and cover fish aquariums before spraying. Hold container upright with nozzle away from you. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 1 second to treat approximately 1 linear foot of baseboard area).

Repeat treatments to infested areas as necessary at intervals of 14 days or greater.

Cockroaches, Ants, Crickets, Earwigs, Firebrats, Fleas, Silverfish, Spiders, and Sowbugs: Apply as a spot or crack and crevice treatment. Apply thoroughly to areas where these pests crawl and hide, especially in cracks and crevices, and hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and in similar areas.

Ants: Spray around ant trails, doors and windows and other places where ants enter premises. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris.

Fleas in Buildings: Apply to infested areas (pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture) and other areas where these pests may be present. Remove old pet bedding and replace with clean fresh bedding after treatment of pet areas. **DO NOT APPLY DIRECTLY ON ANIMALS.**

Spiders: Apply along and behind baseboards, to window and doorframes, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Earwigs, Mole Crickets, Pillbugs, and Sowbugs: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

Pantry Pests - Exposed Stages of Saw-toothed Grain Beetles, Flour Beetles (Red and Confused), and Cigarette Beetles: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

OUTDOORS:

Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm. Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply when windy. Do not water the treated area(s) to the point of run-off or apply when raining or when rain is expected that day.

PESTS ON OUTSIDE SURFACES OF BUILDINGS - For control of building infestation due to Ants, Crickets, Earwigs, and Sowbugs (Pillbugs): Spray foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary but not more than once per week.

Mound Building Ants, including Imported Fire Ants:

[Recommended for Use with [Brand Name's] Aerosol Applicator]

Hold can upright when applying product. To treat mounds, use the [Brand Name] Soil Injector.

Note: Since fire ants may climb up the applicator shaft during use, users should be aware that there is potential for fire ant bites to occur with contact. Before inserting can into soil applicator, use can to spray ants on the surface of the mound for about 10 seconds at a distance of about 18 inches from the surface.

To insert aerosol can into [Brand Name] applicator:

1. Remove Plastic spray tip from aerosol can (if applicable)
2. Place base of aerosol can against applicator spring [graphic]
3. Use can to compress applicator spring [graphic]
4. Push can into position;insuring can is seated in applicator [graphic]

Maximize distribution of insecticide [underground] by inserting the full length of the injector into the mound if possible. Inject the mound at 3-6 sites at a rate of 15 seconds per site. One can will treat about three mounds. For very large mounds, (over 16" diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one injection site in the center. Treat a maximum of 7 mounds per 5000 ft² at any one time. After initial treatment, wait 1 week before retreatment, if necessary. Make a maximum of 10 applications (at minimum 1-week intervals) at any location per year. Treat new mounds as they appear, but do not treat one location more than 10 times per year.

To remove aerosol can from [Brand Name] applicator:

1. Use can to compress applicator spring
2. Remove can from applicator

8/19

Kajun Kane Aerosol Applicator

For outdoor use only!

**READ THE ENTIRE BOOKLET PRIOR TO USE.
USE STRICTLY IN ACCORDANCE WITH ALL
PRECAUTIONS AND DIRECTIONS!**

NOTE:

Tip of applicator should always be pointed towards the ground.
Do not point applicator tip in the direction of others.
Do not hold tip near face.

**Refer to Kajun Kane Fire Ant Spray label for specifics regarding
precautions and use of Kajun Kane's aerosol insecticide.**

Cleaning, Storage & Disposal:

Remove aerosol can before cleaning, storing & disposal of applicator.
Do not contaminate water, food or feed by storage or disposal of applicator or aerosol.

Cleaning: Wash applicator with soap and water and let air dry.
A paperclip can be used to clean out the applicator tip if dirty or clogged.

STORAGE: Do not store near heat or open flame.

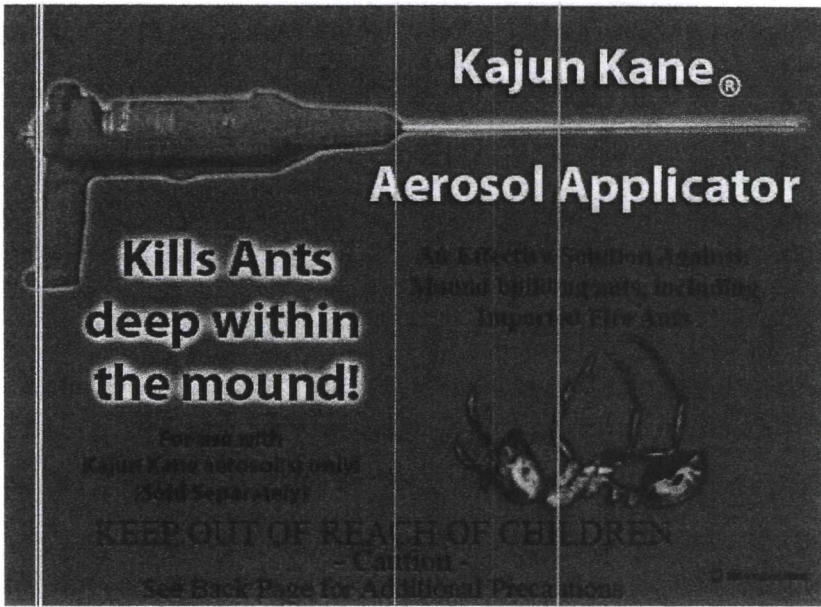

Store in cool dry area away from children.

DISPOSAL: Place in trash or offer for recycling if available.

Call your local solid waste agency for disposal instructions

Directions for use against Mound building ants including Imported Fire Ants:

Hold can upright when applying product. To treat mounds use the Kajun Kane Soil Injector. Note: since the soil may climb up the applicator shaft during use, users should be aware that there is potential for fire ant bites to occur with contact. Before inserting can into soil applicator, use can to spray ants on the surface of the mound for about 10 seconds at a distance of about 10 inches from the surface. Mixture & solution of insecticide (indoxacarb) and by inserting the full length of the can to into the mound (approximately 3-6 inches) at a rate of 10 seconds per site. One can will treat about three mounds. For very large mounds (over 10 chambers) increase the number of injection sites. Spray injection sites in circular pattern on the mound surface with one injection site in the center. Treat a maximum of 7 mounds per 5000 ft² at any one time. After initial treatment wait 1 week before retreatment, if necessary. Make a maximum of 10 applications (at minimum 1-week intervals) at any location per year. Treat new mounds as they appear. Do not use more than one can per 1000 ft² per year.

The Kajun Kane Fire Ant System provides an effective method of Ant Control!

In Combination with Kajun Kane's Fire Ant Spray the Kajun Kane applicator allows the Fire Ant Spray to reach deep within the mound increasing potential exposure to the entire colony. Not just the top of the mound!
