

OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

WASHINGTON, D.C. 20460

February 28, 2025

Noelle Sanfilippo
Regulatory Affairs Specialist
Wellmark International
1501 East Woodfield Road, 200W
Schaumburg, Illinois 60173

Subject: Label Amendment - Registration Review Mitigation for Etofenprox and Tetramethrin
Product Name: CRAWLING INSECT KILLER I
EPA Registration Number: 2724-667
Application Date: May 7, 2024 and February 8, 2021
Decision Number: 595792, 570553
Case Number: 478568

Dear Noelle Sanfilippo:

The Agency, in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, has completed reviewing all the information submitted with your application to support the Registration Review of the above referenced product in connection with the Etofenprox and Tetramethrin Interim Decisions, and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling and must be used at your next label printing. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

If you have any questions about this letter, please contact DeMariah Koger by phone at (202)-566-2288 or via email at koger.demariah@epa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Linda Arrington', with a stylized flourish at the end.

Linda Arrington, Branch Chief
Risk Management and Implementation Branch 4
Pesticide Re-Evaluation Division
Office of Pesticide Programs

ENCLOSURE: Stamped label

SUBLABEL A – OCCUPATIONAL LABEL

ETOFPENPROX	GROUP	3A	INSECTICIDE
--------------------	--------------	-----------	--------------------

CRAWLING INSECT KILLER I

For use in homes, apartment buildings, and the non-food/feed areas of hotels, stores, warehouses, office buildings, schools, nursing homes, hospitals, industrial buildings, building foundations, vessels, rail cars, trucks, trailers, and aircraft (cargo areas only)

Use for fire ants on lawns, landscaped areas, golf courses, and other non-cropland areas: airports, roadsides, cemeteries, commercial grounds, parks, school grounds, picnic grounds, athletic fields and other recreational areas.

Contains Synergized Etofenprox and Tetramethrin

Provides Quick Killing Action and Residual Control

Economical Do-It-Yourself Pest Control

For Both Indoor and Outdoor Use

Kills Fleas - Roaches - Ants

Kills on Contact - Kills Fast

Kills Hidden Bugs

Kills Bugs You See and Even the Ones You Don't See

A broad-spectrum insecticide highly effective against Ants, Carpet Beetles, Cockroaches, Crickets, Earwigs, Firebrats, Fleas, Flour Beetles, Grain Beetles, Pillbugs, Silverfish, Sowbugs, Spiders, Fire Ants, and many other listed crawling insects

No Oily Residue - Low Odor

Recommended for Use with [Brand Name's] Aerosol Applicator

ACTIVE INGREDIENTS:

Tetramethrin (CAS #7696-12-0).....0.2%

Etofenprox (CAS #80844-07-1).....1.0%

Piperonyl Butoxide* (CAS #51-03-6).....1.0%

OTHER INGREDIENTS:**97.8%

Total100.0%

*(butylcarbityl)(6-propylpiperonyl) ether and related compounds

**Contains petroleum distillates

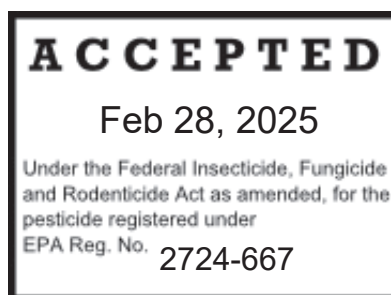

KEEP OUT OF REACH OF CHILDREN CAUTION

See Side Panel For Additional Precautions

NET CONTENTS:

EPA REG. NO. 2724-667

EPA EST. NO.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS & DOMESTIC ANIMALS
CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Repeated exposure to etofenprox can cause skin irritation.

Personal Protective Equipment (PPE):

Applicators must wear

- Long-sleeve shirt,
- Long pants,
- Shoes and socks

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them.

User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID	
If swallowed	<ul style="list-style-type: none">• Immediately call a poison control center or doctor.• Do not induce vomiting unless told to do so by a poison control center or doctor.• Do not give any liquid to the person.• Do not give anything by mouth to an unconscious person.
If in eyes:	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center or doctor for treatment advice.
Note to Physician: Contains petroleum distillate. Vomiting may cause aspiration pneumonia.	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-800-xxx-xxxx for emergency medical treatment information.	

ENVIRONMENTAL HAZARDS

This product is extremely toxic to aquatic organisms, including fish and invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. This product may contaminate water through runoff. This product has a potential for runoff for several weeks after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THE ENTIRE LABEL PRIOR TO USE. USE STRICTLY IN ACCORDANCE WITH ALL LABEL PRECAUTIONS AND DIRECTIONS.

REPORTING ECOLOGICAL INCIDENTS

For guidance on reporting ecological incidents, including death, injury, or harm to plants and animals, including bees and other non-target insects, see EPA's Pesticide Incident Reporting website: <https://www.epa.gov/pesticide-incidents> or call 1-800-248-7763.

RESISTANCE-MANAGEMENT

For resistance management, Crawling Insect Killer I contains a Group 3A insecticide. Any insect population may contain individuals naturally resistant to Crawling Insect Killer I and other Group 3A insecticides. The resistant individuals may dominate the insect population if this group of insecticides are used repeatedly. Appropriate resistance-management strategies should be followed. To delay insecticide resistance, take the following steps:

- Rotate the use of Crawling Insect Killer I or other Group 3A insecticides with different groups that control the same pests.
- Adopt an integrated pest management program for insecticide use that includes scouting, uses historical information related to pesticide use, record keeping and which considers cultural, biological and other chemical control practices.
- Monitor after application for unexpected target pest survival. If the level of survival suggests the presence of resistance, consult with your local university specialist or certified pest control advisor.
- Contact your local extension specialist for any additional pesticide resistance-management and/or IPM recommendations for the specific site and pest problems in your area.

For further information or to report suspected resistance, contact Wellmark International at 1-800-248-7763.

USE RESTRICTIONS

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Do not enter or allow others to enter until sprays have dried.

Do not wet articles to point of runoff or drip.

Do not use treated article until spray has dried.

Do not apply when food is present.

Remove or cover dishes, utensils, food processing equipment, and food preparation surfaces, or wash them before use.

Do not allow the product to enter indoor or outdoor drains unless labeled for drain treatments. (*No permita la entrada a desagües internos o externos a menos que el etiquetado indique que está permitido el uso del producto para tratamiento de desagües.*) Follow proper disposal procedures on this label. (*Siga las indicaciones del etiquetado para el desecho apropiado del producto.*)

Do not use in aircraft cabins.

All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

1. Application to pervious surfaces such as soil, lawn, turf, and other vegetation;
2. Perimeter band treatments of 7 feet wide or less from the base of a man-made structure to pervious surfaces (e.g., soil, mulch, or lawn);
3. Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhang, awning, or other structure;
4. Applications around potential exterior pest entry points into man-made structures such as doorways and windows, when limited to a band not to exceed one inch;
5. Applications to vertical surfaces (such as the side of a man-made structure) directly above impervious surfaces (e.g., driveways, sidewalks, etc.), up to 2 feet above ground level;
6. Applications to vertical surfaces directly above pervious surfaces, such as soil, lawn, turf, mulch or other vegetation) only if the pervious surface does not drain into ditches, storm drains, gutters, or surface waters.

Spot Treatment Guidance Statement: Spot treatments must not exceed two square feet in size (for example, 2 ft. by 1 ft. or 4 ft. by 0.5 ft.).

Buffer from Water Statement: For soil or foliar applications, do not apply by ground within 25 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries and commercial fish farm ponds.

Water Protection Statements: Do not apply the product into fish pools, ponds, streams, or lakes. Do not apply directly to sewers or storm drains, or to any area like a drain or gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack-and-crevice treatment. Do not apply or irrigate to the point of runoff.

Rain-Related Statements: Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application.

Crack and Crevice Treatments: Treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices, applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

Do not apply when the wind speed is greater than 15 mph.

To apply at the maximum rate, spray for about 25 seconds to cover a space of 100 sq ft (10' x 10').

USE INFORMATION: For both indoor and outdoor use. Etofenprox Crawling Insect Killer I provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include: apartment buildings, homes, hospitals, and the non-food/feed areas of hotels, industrial buildings, laboratories, mausoleums, motels, nursing homes, private residences, schools, stores, utilities warehouses, and in non-food areas of restaurants, food manufacturing, processing, and servicing establishments, and on: vessels, rail cars, aircraft (cargo areas only), buses, trucks and trailers.

INDOORS:

Do not apply to classrooms when in use. Do not apply to patient rooms in hospitals and nursing homes while occupied. For use in the non-food and non-feed areas of food and feed handling establishments. Non-food and non-feed areas of food and feed establishments are: garbage rooms, lavatories, floor drains (to sewer entries and vestibules), offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning and bottling). Do not use in food or feed areas of food or feed handling establishments, restaurants or other areas where food or feed is commercially prepared or processed. Do not use in serving areas while food is exposed or the facility is in operation. Serving areas are areas where prepared foods are served, dining rooms but excluding areas where foods may be prepared or held.

Remove pets, birds, and cover fish aquariums before spraying. Hold container upright with nozzle away from you. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 1 second to treat approximately 1 linear foot of baseboard area).

Repeat treatments to infested areas as necessary at intervals of 14 days or greater.

Cockroaches, Ants, Crickets, Earwigs, Firebrats, Fleas, Silverfish, Spiders, and Sowbugs: Apply as a spot or crack and crevice treatment. Apply thoroughly to areas where these pests crawl and hide, especially in cracks and crevices, and hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and in similar areas.

Ants: Spray around ant trails, doors and windows and other places where ants enter premises. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris.

Fleas in Buildings: Apply to infested areas (pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture) and other areas where these pests may be present. Remove old pet bedding and replace with clean fresh bedding after treatment of pet areas. **DO NOT APPLY DIRECTLY ON ANIMALS.**

Spiders: Apply along and behind baseboards, to window and doorframes, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Earwigs, Mole Crickets, Pillbugs, and Sowbugs: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

Pantry Pests - Exposed Stages of Saw-toothed Grain Beetles, Flour Beetles (Red and Confused), and Cigarette Beetles: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

OUTDOORS:

Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm. Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply when windy. Do not water the treated area(s) to the point of run-off or apply when raining or when rain is expected that day.

PESTS ON OUTSIDE SURFACES OF BUILDINGS - For control of building infestation due to Ants, Crickets, Earwigs, and Sowbugs (Pillbugs): Spray foundation of building where insects are active and may find entrance up to a height of 2 feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary but not more than once per week.

Mound Building Ants, including Imported Fire Ants:

[Recommended for Use with [Brand Name's] Aerosol Applicator]

Hold can upright when applying product. To treat mounds, use the [Brand Name] Soil Injector.

Note: Since fire ants may climb up the applicator shaft during use, users should be aware that there is potential for fire ant bites to occur with contact. Before inserting can into soil applicator, use can to spray ants on the surface of the mound for about 10 seconds at a distance of about 18 inches from the surface.

To insert aerosol can into [Brand Name] applicator:

1. Remove Plastic spray tip from aerosol can (if applicable)
2. Place base of aerosol can against applicator spring [graphic]
3. Use can to compress applicator spring [graphic]
4. Push can into position;insuring can is seated in applicator [graphic]

Maximize distribution of insecticide [underground] by inserting the full length of the injector into the mound if possible. Inject the mound at 3-6 sites at a rate of 15 seconds per site. One can will treat about three mounds. For very large mounds, (over 16" diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one injection site in the center. Treat a maximum of 7 mounds per 5000 ft² at any one time. After initial treatment, wait 1 week before retreatment, if necessary. Make a maximum of 10 applications (at minimum 1-week intervals) at any location per year. Treat new mounds as they appear, but do not treat one location more than 10 times per year.

To remove aerosol can from [Brand Name] applicator:

1. Use can to compress applicator spring
2. Remove can from applicator

Kajun Kane Aerosol Applicator

For outdoor use only!

**READ THE ENTIRE BOOKLET PRIOR TO USE.
USE STRICTLY IN ACCORDANCE WITH ALL
PRECAUTIONS AND DIRECTIONS!**

NOTE:

Tip of applicator should always be pointed towards the ground.
Do not point applicator tip in the direction of others.
Do not hold tip near face.

**Refer to Kajun Kane Fire Ant Spray label for specifics regarding
precautions and use of Kajun Kane's aerosol insecticide.**

Cleaning, Storage & Disposal:

Remove aerosol can before cleaning, storing & disposal of applicator.
Do not contaminate water, food or feed by storage or disposal of applicator or aerosol.

Cleaning: Wash applicator with soap and water and let air dry.
A paperclip can be used to clean out the applicator tip if dirty or clogged.

STORAGE: Do not store near heat or open flame.

Store in cool dry area away from children.

DISPOSAL: Place in trash or offer for recycling if available.

Call your local solid waste agency for disposal instructions

WARRANTY: Seller warrants that this product complies with the specifications expressed in this label. To the extent consistent with applicable law, Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. To the extent consistent with applicable law, Seller's liability or default, breach or failure under this label shall be limited to the amount of the purchase price. To the extent consistent with applicable law, Seller shall have no liability for consequential damages.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS & DOMESTIC ANIMALS
CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear long sleeved shirt and long pants, socks and shoes. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Repeated exposure to etofenprox can cause skin irritation.

FIRST AID	
If swallowed	<ul style="list-style-type: none">• Immediately call a poison control center or doctor.• Do not induce vomiting unless told to do so by a poison control center or doctor.• Do not give any liquid to the person.• Do not give anything by mouth to an unconscious person.
If in eyes:	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center or doctor for treatment advice.
Note to Physician: Contains petroleum distillate. Vomiting may cause aspiration pneumonia.	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-800-xxx-xxxx for emergency medical treatment information.	

ENVIRONMENTAL HAZARDS

This product is extremely toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to or near water. Drift and runoff may be hazardous to fish in water adjacent to treated areas. See Directions for Use for additional precautions and requirements.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

REPORTING ECOLOGICAL INCIDENTS

For guidance on reporting ecological incidents, including death, injury, or harm to plants and animals, including bees and other non-target insects, see EPA's Pesticide Incident Reporting website: <https://www.epa.gov/pesticide-incidents> or call 1-800-248-7763.

READ THE ENTIRE LABEL PRIOR TO USE. USE STRICTLY IN ACCORDANCE WITH ALL LABEL PRECAUTIONS AND DIRECTIONS.

USE RESTRICTIONS

Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift.

Do not wet articles to point of runoff or drip.

Do not use treated article until spray has dried.

Do not allow adults, children, or pets to enter the treated area until sprays have dried.

Remove or cover exposed food and drinking water before application.

Remove or cover dishes, utensils, food processing equipment, and food preparation surfaces, or wash them before use.

Do not allow the product to enter indoor or outdoor drains. (*No permita la entrada a desagües internos o externos.*) Follow proper disposal procedures on this label. (Siga las indicaciones del etiquetado para el desecho apropiado del producto.)

All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

1. Application to pervious surfaces such as soil, lawn, turf, and other vegetation;
2. Perimeter band treatments of 7 feet wide or less from the base of a man-made structure to pervious surfaces (e.g., soil, mulch, or lawn);
3. Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhang, awning, or other structure;
4. Applications around potential exterior pest entry points into man-made structures such as doorways and windows, when limited to a band not to exceed one inch;
5. Applications to vertical surfaces (such as the side of a man-made structure) directly above impervious surfaces (e.g., driveways, sidewalks, etc.), up to 2 feet above ground level;
6. Applications to vertical surfaces directly above pervious surfaces, such as soil, lawn, turf, mulch or other vegetation) only if the pervious surface does not drain into ditches, storm drains, gutters, or surface waters.

Spot Treatment Guidance Statement: Spot treatments must not exceed two square feet in size (for example, 2 ft. by 1 ft. or 4 ft. by 0.5 ft.).

Buffer from Water Statements: For soil or foliar applications, do not apply by ground within 25 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries and commercial fish farm ponds.

Water Protection Statements: Do not spray the product into fish pools, ponds, streams, or lakes. Do not apply directly to sewers or storm drains, or to any area like a drain or gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack-and-crevice treatment. Do not apply or irrigate to the point of runoff.

Rain-Related Statements: Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application.

Crack and Crevice Treatments: Treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices, applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

Do not apply when the wind speed is greater than 15 mph.

To apply at the maximum rate, spray for about 25 seconds to cover a space of 100 sq ft (10' x 10').

USE INFORMATION: For both indoor and outdoor use. Etofenprox Crawling Insect Killer I provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include: apartment buildings, homes, private residences, and on trucks and trailers.

INDOORS:

Remove pets, birds, and cover fish aquariums before spraying. Hold container upright with nozzle away from you. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 1 second to treat approximately 1 linear foot of baseboard area).

Repeat treatments to infested areas as necessary at intervals of 14 days or greater.

Cockroaches, Ants, Crickets, Earwigs, Firebrats, Fleas, Silverfish, Spiders, and Sowbugs: Apply as a spot or crack and crevice treatment. Apply thoroughly to areas where these pests crawl and hide, especially in cracks and crevices, and hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and in similar areas.

Ants: Spray around ant trails, doors and windows and other places where ants enter premises. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris.

Fleas in Buildings: Apply to infested areas (pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture) and other areas where these pests may be present. Remove old pet bedding and replace with clean fresh bedding after treatment of pet areas. **DO NOT APPLY DIRECTLY ON ANIMALS.**

Spiders: Apply along and behind baseboards, to window and doorframes, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Earwigs, Mole Crickets, Pillbugs, and Sowbugs: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

Pantry Pests - Exposed Stages of Saw-toothed Grain Beetles, Flour Beetles (Red and Confused), and Cigarette Beetles: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

OUTDOORS:

Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm. Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply when windy. Do not water the treated area(s) to the point of run-off or apply when raining or when rain is expected that day.

PESTS ON OUTSIDE SURFACES OF BUILDINGS - For control of building infestation due to Ants, Crickets, Earwigs, and Sowbugs (Pillbugs): Spray foundation of building where insects are active and may find entrance up to a height of 2feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary but not more than once per week.

Mound Building Ants, including Imported Fire Ants:

[Recommended for Use with [Brand Name's] Aerosol Applicator]

Hold can upright when applying product. To treat mounds, use the [Brand Name] Soil Injector.

Note: Since fire ants may climb up the applicator shaft during use, users should be aware that there is potential for fire ant bites to occur with contact. Before inserting can into soil applicator, use can to spray ants on the surface of the mound for about 10 seconds at a distance of about 18 inches from the surface.

To insert aerosol can into [Brand Name] applicator:

1. Remove Plastic spray tip from aerosol can (if applicable)
2. Place base of aerosol can against applicator spring [graphic]
3. Use can to compress applicator spring [graphic]
4. Push can into position;insuring can is seated in applicator [graphic]

Maximize distribution of insecticide [underground] by inserting the full length of the injector into the mound if possible. Inject the mound at 3-6 sites at a rate of 15 seconds per site. One can will treat about three mounds. For very large mounds, (over 16" diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one injection site in the center. Treat a maximum of 7 mounds per 5000 ft² at any one time. After initial treatment, wait 1 week before retreatment, if necessary. Make a maximum of 10 applications (at minimum 1-week intervals) at any location per year. Treat new mounds as they appear, but do not treat one location more than 10 times per year.

To remove aerosol can from [Brand Name] applicator:

1. Use can to compress applicator spring
2. Remove can from applicator

Kajun Kane Aerosol Applicator

For outdoor use only!

**READ THE ENTIRE BOOKLET PRIOR TO USE.

effective method
of Ant Control!**

**Directions for use against:
Mound building ants, including
Imported Fire Ants.**

Hold can upright when applying product. To treat mounds, use the Kajun Kane Soil Injector.

Note: Since fire ants may climb up the applicator shaft during use, users should be aware that there is potential for fire ant bites to occur with contact. Before inserting can into soil applicator, use can to spray ants on the surface of the mound for about 10 seconds at a distance of about 18 inches from the surface. Maximize distribution of insecticide [underground] by inserting the full length of the injector into the mound if possible. Inject the mound at 3-6 sites at a rate of 15 seconds per site. One can will treat about three mounds. For very large mounds, (over 16" diameter) increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one injection site in the center. Treat a maximum of 7 mounds per 5000 ft² at any one time. After initial treatment, wait 1 week before retreatment, if necessary. Make a maximum of 10 applications (at minimum 1-week intervals) at any location per year. Treat new mounds as they appear, but do not treat one location more than 10 times per year.

In Combination with Kajun Kane's Fire Ant Spray, the Kajun Kane applicator allows the Fire Ant Spray to reach deep within the mound increasing potential exposure to the entire colony! Not just the top of the mound!
