Subject: Registration Review Label Mitigation for d-limonene
Product Name: Holiday Flea & Tick Shampoo for Dogs, Cats, Puppies and
Kittens
EPA Registration Number: 2724-759
Decision Number: 521848

Dear Dr. McFadden:

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the Registration Review of the above referenced product in connection with the d-limonene. Final and/or Interim Decision, and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

A copy of your label stamped "Accepted" is enclosed. Products shipped after 12 months from the date of this amendment must bear the new revised label. Your release for shipment of the product bearing the amended label constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

MORE THAN 5 POUNDS**

ZONE CONTROL

To prevent reoccurrence of fleas, a total management program is recommended. You should treat the areas where fleas live with the HOLIDAY® 4 -Step Program which consists of: Step 1 - Shampoo/Dip the Pet; Step 2 - Treat the Home and Yard; Step 3 - Flea and Tick Collars on the Pet; Step 4 - Maintenance Sprays and Powders. Ask your pet care professional for specific recommendations on how to best control fleas for the comfort and well being of your pet and family.

[Alternate to zone control language]

[Holiday Flea & Tick Shampoo is highly regarded not only as an effective flea & tick killer, but also as a superior grooming product. Its non-alkaline formula contains the key active ingredient, d-Limonene, a pleasant citrus-scented insecticide, plus cleansing agents, lanolin and special conditioners. As a result, tangles brush out easily, leaving the pet with a clean, soft, shiny, healthier-looking coat and a fresh, clean smell. [For added protection against fleas and ticks, use [brand name] Flea & Tick Dip and Spray as part of pet grooming.] As with any quality product, be sure to read all label instructions carefully.]

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Do not get in eyes. Harmful if swallowed. While washing dogs, cats, kittens or puppies, avoid getting shampoo in animal's eyes. Do not use on kittens or puppies under 12 weeks of age. Consult a veterinarian before using this product on debilitated, aged, pregnant or nursing animals, or animals on medication.

Applicators of flea shampoo products are to use protective gloves to reduce the risk of dermal irritation or dermal sensitization.

Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Individual animals may exhibit one or more of the following symptoms: hypothermia, tremors, ataxia, excess salivation, agitation and vocalization followed by lethargic behavior, skin and eye irritation in varying degrees. Discontinue use if one or more of the above symptoms develops. May be used in conjunction with organophosphates and carbamate based insecticides. Does not inhibit acetylcholinesterase activity.
