Schaumburg, IL 60173

OCT 16 2012

Dear Dr. McFadden:

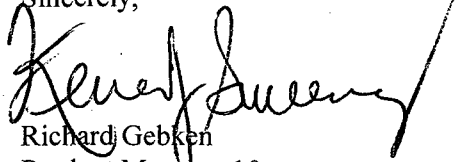

Subject: Label Amendment  
Product Name: RF2063 Pet Spray  
EPA Registration No. 2724-797  
Application dated August 27, 2012

The label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, is acceptable. The following conditions, as outlined in my letter dated November 9, 2010, no longer apply to this registration because this product is not a pet spot-on product.

1. You are not required to submit quarterly enhanced incident reports and quarterly sales information in doses sold for this product beginning January 1, 2011.
2. Your registration is not time limited. As such, it does not have an expiration date.

A stamped copy of the label is enclosed for your records. If you have any questions, please contact Kevin Sweeney at (703) 305-5063. Thank you for your cooperation in this matter.

Sincerely,

  
Richard Gebken  
Product Manager 10  
Registration Division (7505P)  
Insecticides Branch

EPA Reg. No. 2724-797  
EPA Est. No.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS -CAUTION:** Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Repeated exposure to etofenprox can cause skin irritation.

**HAZARDS TO DOMESTIC ANIMALS - CAUTION:** Do not use on puppies less than 10 weeks of age. For external use only. Drooling may be observed for a short period of time immediately following product application. Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or animals on medication. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

<b>FIRST AID</b>	
If in eyes	<ul style="list-style-type: none"> <li>• Call a poison control center or doctor for treatment advice.</li> <li>• Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> </ul>
Have the product container or label with you when calling a poison control center, doctor, or veterinarian or going for treatment. You may also contact 1-800-XXX-XXXX for emergency medical treatment information.	

**PHYSICAL HAZARDS:** Combustible. Do not use or store near heat or open flame.

**[Brand Name] [Product Name] RF2063 PET SPRAY**

With Etofenprox, [to kill adult insects] Plus [S-Methoprene] Precor® Insect Growth Regulator [to kill flea eggs and larvae]

**IMPORTANT! READ ENTIRE LABEL BEFORE EACH USE  
USE ONLY ON DOGS AND PUPPIES MORE THAN 10 WEEKS OLD**

**HOW RF2063 PET SPRAY WORKS:**

**RF2063 Pet Spray** kills adult fleas, flea eggs, flea larvae, ticks, and repels mosquitoes. Flea eggs and larvae sprayed with **RF2063 Pet Spray** will not grow into adults.

**[Product Name]** combines the adult flea killing power of etofenprox with the long-lasting flea egg-killing power of [S-Methoprene] PRECOR® Insect Growth Regulator. This highly effective combination of ingredients provides quick relief from biting fleas and continuous killing of flea eggs laid on the animal, breaking the flea life cycle. The elimination of both adult fleas and flea eggs is important because adult fleas live on your pet, causing discomfort and skin irritation, while the vast number of eggs that they lay fall off and develop in your house. If fleas are already developing in your house, then use a [Brand Name] premise product. Effective flea control requires treatment of your pets, house, and yard.

**DIRECTIONS FOR USE** - It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**USE RESTRICTIONS**

The maximum application rate for this product is twice per month, and the second application must be made more than 8 days after the initial application.

**SHAKE WELL BEFORE USING.**

**For Fleas and Ticks:** A light, even coverage of the hair coat will provide effective flea control. Do not allow spray from application or damp dog/puppy to come into contact with painted or finished surfaces, including wood floors/furniture, leather/vinyl materials, or other surfaces of concern.

1. For best results, ruffle the coat while spraying against the natural lay of the hair. Cover dog's/puppy's eyes with hand. With a firm, fast stroke, spray head, ears, and chest. If you see a tick, spray it directly.
2. With cloth, rub on face around mouth, nose, and eyes. Then spray the neck, middle and hind quarters, finishing with legs and tail last. Avoid spraying rectum and genitals.
3. For all dogs, spray until damp, not saturated. Do not allow dogs/puppies to become chilled.
4. If your dog/puppy becomes reinfested with adult fleas or ticks from outside sources, [RF2063 Pet Spray] may be reapplied every two weeks after the initial application. Repeat every month for continuous home flea and tick infestation prevention.

**Recommended dosage:** Note that the recommended dose is about 4 squeezes of the trigger sprayer [0.13 fluid ounce] per pound of body weight. Short-haired dogs/puppies will need less; more spray may be needed for long-haired dogs/puppies. In all cases, apply spray until the coat is damp, not saturated.

**For Mosquitoes:** A light, even coverage of the hair coat (as applied for flea control), will also provide effective repellency of mosquitoes.

RF2063 PET SPRAY is most effective when used as part of a total flea and tick management program. Use other [Brand Name] products registered for residential [area] [premise] control [(carpets, upholstery and pet bedding)] of these pests in conjunction with this treatment. Monthly premise treatments are required for optimal control and prevention of fleas and ticks.

The successive feeding activity of fleas on pets may elicit a hypersensitivity skin disorder known as flea allergy dermatitis (FAD). Treatment of dogs/puppies with RF2063 Pet Spray kills fleas and may reduce the incidence of this condition.

**STORAGE and DISPOSAL:** **Pesticide Storage:** Do not store near heat or open flame. Store away from children and animals. **Disposal: Nonrefillable container.** Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

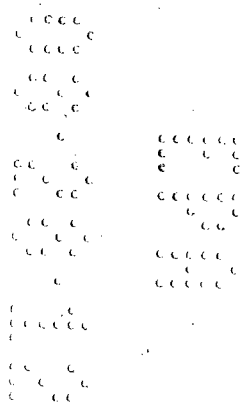

**WARRANTY AND CONDITIONS OF SALE:**

Seller warrants that this product conforms to the chemical specifications expressed on the label. To the extent consistent with applicable law, Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. To the extent consistent with applicable law, seller's liability for default, breach or failure under this label shall be limited to the amount of the purchase price. To the extent consistent with applicable law, Seller shall have no liability for consequential damages.

In case of emergency or for product use information, call **1-800-xxx-xxxx**
