

WEED KILLER No. 6

Active Ingredients:

Aromatic Petroleum Distillate 100%

For control of:

- Puncture Vine
- Pigweed
- Leafy Spurge
- Wild Oats
- Wild Mustard

Effective against:

- Bermuda Grass
- Horse Tail
- Salt Grass
- Johnson Grass
- Nutgrass

CAUTION! Keep out of reach of Children

If swallowed—call physician at once. Avoid skin contact. To avoid possible skin irritation, wash hands, face and other exposed parts of body with mild soap and water at least every 2 hours when exposed to drifting spray. Should soreness develop, treat as mild sunburn.

PRODUCT OF

Hykil Sales corporation

P. O. Box 869 • 1020 E. Santa Ana Blvd.
Santa Ana, Calif. 92702

DIRECTIONS FOR USE

HYKIL WEED KILLER #6 may be diluted with from two to three parts water if being applied with spraying equipment having adequate positive agitation. In equipment having no agitation we recommend the application of this product undiluted.

MIXING—Use one part HYKIL WEED KILLER #6 and two parts water for general, all-purpose weed control. One part HYKIL to three parts water may be used if weeds are under 4" in height. Start pump and agitator. Allow about 2 minutes for proper agitation in most equipment.

SPRAYING—Apply mixture to roadsides, drainage ditch-banks, industrial sites, and similar non-crop areas. AVOID DRIFT TO DESIRABLE PLANTS. Use pressures from 40 to 120 pounds. Low pressures give better weed coverage, high pressures give better penetration of tufted and matted grasses. Saturate Grasses and Weeds Completely. Thoroughness of application determines results.

QUANTITY—Users report average weed growth may be controlled with from 100 to 150 gallons of mixture per acre. This may vary with different seasons, temperatures, density of growth and soil moisture. Consult your county, state or federal agricultural advisors for local application rates.

RESPRAYING—Secondary follow-up applications are most important in gaining effective control of many weeds and grasses. Respray area when regrowth is from 2" to 5" high. Several applications may be necessary for control of deep-rooted grasses and perennial weeds. Early respraying saves materials and improves results. HYKIL WEED KILLER #6 is a specially refined concentrate of the petroleum compounds found most effective in controlling weeds and grasses. It is easy to apply, economical and gives a fast yet long lasting kill on both broad-leaved weeds and perennial grasses. Since HYKIL WEED KILLER #6 is a concentrate it may be diluted with several parts water without lowering its effectiveness. HYKIL WEED KILLER #6 has outstanding wetting and spreading qualities and blends with water very uniformly under agitation during application.

DO NOT CONTAMINATE WATER BY CLEANING OF EQUIPMENT OR DISPOSAL OF WASTES.
DO NOT CONTAMINATE WATER USED FOR IRRIGATION OR DOMESTIC PURPOSES.
Recommended time for initial application is when weeds are 4-5" in height.
Do not reuse container. Destroy when empty.

NON-WARRANTY: Since the application of this product is not under the control of the marketer, the Hykil Sales Corp. cannot warrant this product.
