

DIRECTIONS FOR USE  
See Side Panels

# BUTYL-6

GENERAL INFORMATION

## WEED KILLER

ACCEPTED  
UNDER THE FEDERAL INSECTICIDE  
FUNGICIDE AND ROBOTIC ACT  
FOR ECONOMIC PEST CONTROL  
REGULATED UNDER FIFED

CAUTION

**ACTIVE INGREDIENTS:**

Equivalent of 2,4 Dichlorophenoxyacetic acid

2,4 Dichlorophenoxyacetic acid equivalent to 100

ACTIVE INGREDIENT	20
TOTAL	100

Each gallon contains 6.1 lbs. of active ingredient in Oil or Emulsion

**CAUTION: KEEP OUT OF THE REACH OF CHILDREN. See Side Panels For Other Cautions.**

WARRANTY AND LIMITATION OF DAMAGES

*Pueblo Chemical Corporation*

USE INSTRUCTIONS

# LV-4

## WEED KILLER

(Low Volatile Emulsifiable)

*W/Label 20-473*

### SMALL GRAIN CROPS

**CORN:** Pre-emergence, use LV-4 at the rate of 1 to 2 pints per acre in water for uniform coverage. Best results are obtained when applied 3 to 5 days after planting, but before emergence. **DO NOT** apply to light soils. Apply at the rate of 2 1/3 to 1 pint per acre to corn 10 inches in height, using a nozzle which directs the spray down the base of the plant. **DO NOT** apply from tasseling.

**SORGHUM:** Apply at the rate of 2/3 to 1 pint per acre in water to 6 to 12 inches high and before tasseling. Use drop nozzles. **DO NOT** apply from tasseling.

### PASTURES

**DO NOT** apply to pastures where livestock are grazing. **DO NOT** apply to pastures where livestock are grazing.

### WOODY PLANT CONTROL

### GENERAL WEED CONTROL

<b>ACTIVE INGREDIENTS:</b>	
2-Ethylhexyl (Isooctyl) Ester of 2,4-Dichlorophenoxyacetic Acid*	69.2%
<b>INERT INGREDIENTS:</b>	30.8%
<b>TOTAL</b>	<b>100.0%</b>

\*Equivalent to 2,4-Dichlorophenoxyacetic Acid  
Contains 1 lbs. 2,4-D Acid Equivalent Per Gallon

Avoid contact with skin, eyes or clothing. If contact is made, wash with plenty of water. Avoid spray drift to susceptible plants.

**DO NOT** allow spray to drift to susceptible plants such as cotton, tomatoes, flowers, grapes, fruit trees and vegetables. Drift may cause severe injury to non-targeted plants. Coarse sprays are less likely to drift. Although this ester is much less volatile than the parent ester of 2,4-D, high temperatures may occur after application which might injure plants nearby.

**DO NOT** contaminate air and water for domestic purposes.

**DO NOT** use the same equipment for spraying this material as for other pesticides.

**DO NOT** use in confined spaces.

**DO NOT** use in residential areas.

**DO NOT** use in areas where children play.

### CAUTION:

**KEEP OUT OF THE REACH OF CHILDREN.**  
**POISONOUS IF SWALLOWED.** See Side Panels
