FOR RAPID, EFFECTIVE KILL OF WILDFOWL, PASTURE, CORN, AND RYE, SLOW GROWING ROADSIDE WEEDS, DITCH BANKS WITHIN 25 FEET WIDE, AND OTHER EASIES.

HOW TO USE: Apply Stull's Low Volatile Weed Killer at the rate of 1/2 to 1 quart per acre. In a tank-mixture with water, apply by hand sprayer or power equipment. Apply the mixture on a hot, dry day, when weeds are dry. Be sure to cover all weeds, including those in the soil. If more than one application is necessary, apply every 7 days, but not more than 4 applications in any season. If weeds are particularly stubborn, use at least 1/2 gallon per acre per application.

AMOUNT TO USE: Follow above instructions for gallon uses, remembering to adjust to different conditions. Do not use excess amounts, and be sure to cover all weeds. Do not use on crops which are growing rapidly or which are under unusual conditions. Do not use on crops which are growing rapidly or which are under unusual conditions.

WHEN TO USE: Apply the mixture on a hot, dry day, when weeds are dry. Be sure to cover all weeds, including those in the soil. If more than one application is necessary, apply every 7 days, but not more than 4 applications in any season. If weeds are particularly stubborn, use at least 1/2 gallon per acre per application.

ACTIVE INGREDIENT: 2,4-Dichlorophenoxyacetic Acid

INERT INGREDIENTS: Water
