

DIRECTIONS

Shake the dust into the nozzle a little at a time to prevent clogging. Spray by squeezing the center part of the bottle with finger tips. The dust must be placed only in areas inaccessible to children and pets. Any powder visible after application is completed should be carefully brushed into cracks and crevices to be removed. Such dust may be applied on surfaces behind sinks, refrigerators, stoves and cabinets that are not accessible to children and pets. No generalized use in the household would be acceptable. Best results may be obtained from 5 to 10 days.
