For Use on Citrus:

Dilute 1 gallon of Deccosol 122 Concentrate with 40 to 72 gallons of water for use in citrus wash tanks at a concentration ranging from 0.2 to 0.35% sodium orthophenylphenate (anhydrous). Caustic soda should be added, when necessary, to maintain the pH in the wash tank above 11.6. The citrus should not be in the wash tank for more than 5 minutes and must be rinsed thoroughly with fresh water upon leaving the tank.

Sanitation of Produce Picking Containers:

Dilute 1 gallon of Deccosol 122 with 69 gallons of water to give a treating concentration of 0.21% sodium orthophenylphenate (anhydrous). This can be applied by brushing, dipping or spraying. Do not rinse. Do not put produce in sanitized picking container until the container is completely dry.

In Citrus Bin Drenchers (CALIFORNIA ONLY)

When filling the drencher, add 1 gallon of Deccosol 122 to 413 gallons of water to give a treating concentration of 0.035% of (350 ppm) sodium orthophenylphenate (anhydrous). Do not use over 500 ppm (1 gallon of Deccosol 122 to 289 gallons of water) to avoid injury to citrus. During operation of bin drencher add 1 gallon of Deccosol 122 to 413 gallons of make-up water to maintain treating concentration of 350 ppm. While bins are being drenched, increase the feed rate of the Deccosol 122 pump slightly to maintain the 350 ppm treatment level.
