

DIRECTIONS

This product is used to control growth of algae in swimming pools. For an initial application to a clean pool with no visible algae, use one gallon KLEER-SWIM SWIMMING POOL ALGICIDE per 25,000 gallons of water. Use one quart per 50,000 gallons of water every third to seventh day depending on weather and use factors. After each rain of consequence, add one quart per 50,000 gallons of water.

Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of KLEER-SWIM SWIMMING POOL ALGICIDE should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool.

TO DETERMINE POOL CAPACITY

Rectangular Pools—Length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval Pools—Long diameter times short diameter times average depth (in feet) times 5.9 equals gallons.

KLEER-SWIM SWIMMING POOL ALGICIDE is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of KLEER-SWIM POOL ALGICIDE tends to stabilize the total chemical treatment system.

KLEER-SWIM SWIMMING POOL ALGICIDE is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form this chemical should not come into contact with high concentrations of chlorine. **DO NOT MIX KLEER-SWIM SWIMMING POOL ALGICIDE AND CHLORINE TOGETHER** when adding to the pool. These chemicals should be handled separately.

KLEER-SWIM SWIMMING POOL ALGICIDE is economical, efficient and stable. It is non-staining in use dilution.

DANGER: Keep Out of Reach of Children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink **PROMPTLY** a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

Rinse empty container thoroughly with water and discard it.

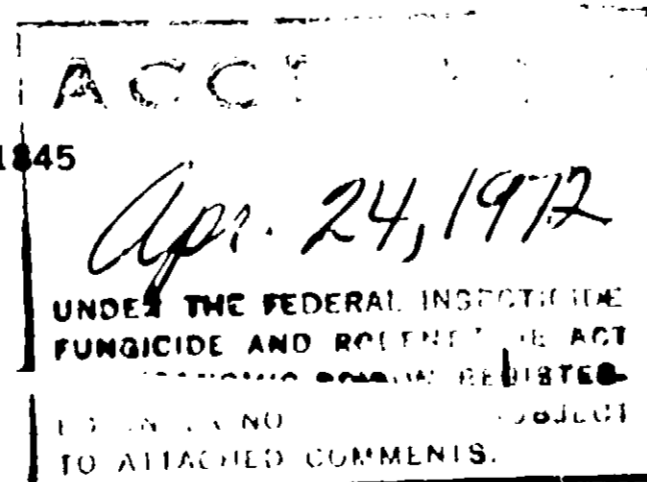

This product is toxic to fish. Do not discharge treated water in lakes, streams or ponds.
