It is a violation of Federal law to use this product in a manner inconsistent with its

Socci 3500-WP is waxy semi-solid when cold. For ease in making dilutions, it is advisable to warm it to approximately 110 - 120°F, at which temperature it is a freeflowing liquid. Electric strap heaters for drums are available for this purpose.

Socci 3500-WP can be diluted with any common organic solvent such as mineral spirits. Stoddard solvent or naphtha. Where extremely fast drying is required, an aromatic such as xyloi is recommended.

For the treatment of textiles, a level of 2% to 8% Socci 3500-WP based on the weight of the finished fabric is recommended. In general, heavier goods will require less protection than lightweight goods. Government specifications requiring solubilized copper-8-quinolinolate require from 2.5% to 10%, depending on the service life required
