MYSTOX LPL - 40S
CONTROLS MOLD AND MILDEW ORGANISMS AND
ROT AND DECAY ORGANISMS IN TEXTILES

CAUTION
KEEP OUT OF REACH OF CHILDREN
FOR COMMERCIAL USE ONLY

Do not allow contact with skin. If splashed on skin wash thoroughly with soap and water. Do not allow material to be splashed in eyes. If splashed in eyes wash eyes immediately with copious amounts of water and secure medical attention immediately. Wash after handling. Avoid contact with clothing. Harmful if swallowed.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

DIRECTIONS FOR USE

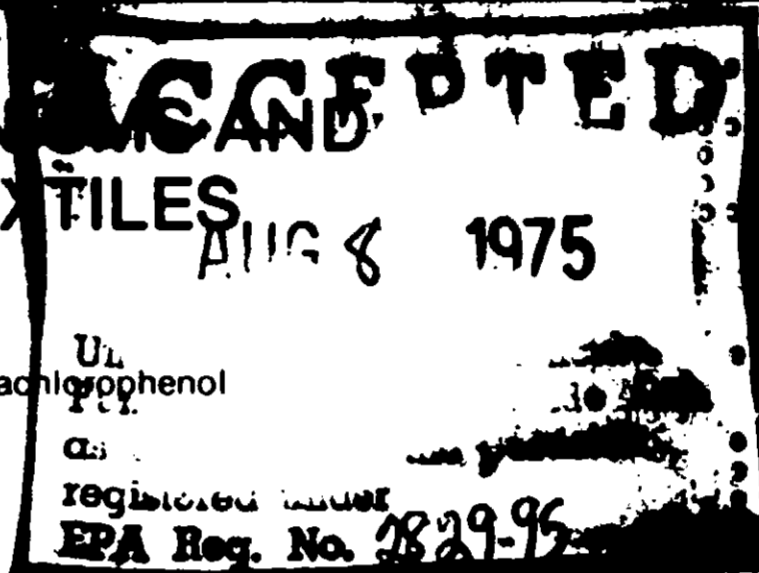

MYSTOX LPL - 40S is a weather resistant fungistat containing 40% fatty acid esters of pentachlorophenol for textile industry applications. This fungistat does not discolor cellulosic fabrics and is resistant to leaching. Fabrics treated with the recommended levels of MYSTOX LPL - 40S will survive extended soil burial without appreciable loss of tensile strength, and will control mold and mildew organisms so often associated with spotting and staining of fabrics. MYSTOX LPL - 40S is not irritating to the skin at suggested application levels.

MYSTOX LPL - 40S contains mineral spirits as the solvent and is compatible with any oil soluble system. Conventional padding equipment may be used after which the fabric can be dried on cans or on a frame.

MYSTOX LPL - 40S should be used at a level of 2.5-5.0% based on the weight of the finished product.

"It is a violation of Federal law to use this product in a manner inconsistent with its labeling."

Active ingredient:
Fatty acid esters of pentachlorophenol
(C₆-C₂₀)
Inert ingredients:

To avoid contact with fish. To avoid contact should not be discharged where it will drain into lakes, streams, ponds, or other water. Do not let rain wash water by cleaning of equipment, or disposal of wastes.

Do not empty into drain. Return to drum or container if destroyed by perforating or crushing and burying in a safe place.

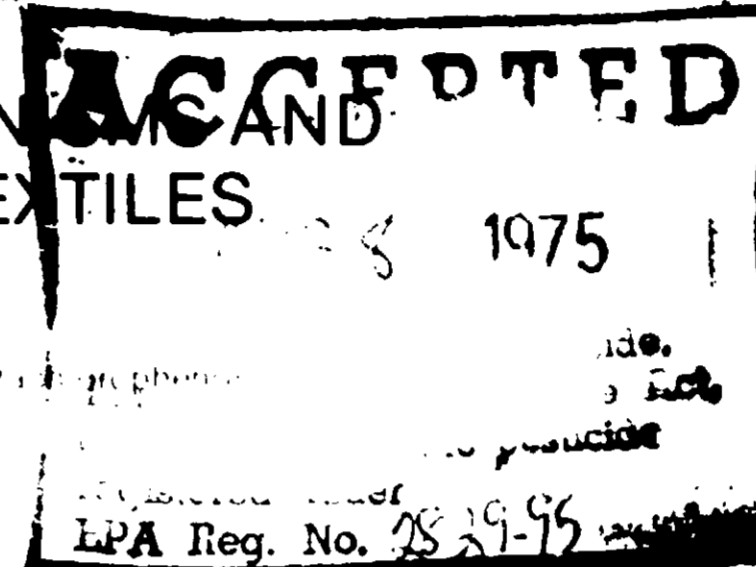

DIRECTIONS FOR USE

MYSTOX LPL - 40S is a weather resistant fungistat containing 40% fatty acid esters of pentaerythritol for textile and fabric applications. This fungistat does not discolor cellulosic fabrics and does not affect washing. Fabrics treated with the recommended levels of MYSTOX LPL - 40S will retain their original material without appreciable loss of tensile strength, and will resist mold and mildew organisms often associated with spotting and staining of fabrics. MYSTOX LPL - 40S is not irritating to the skin at suggested application levels.

MYSTOX LPL - 40S may be mixed with mineral spirits as the solvent and is compatible with any oil soluble dye. The recommended application equipment may be used after which the fabric can be processed as usual.

MYSTOX LPL - 40S may be used at a level of 2.5-5.0% based on the weight of the finished product.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

MYSTOX LPL-40S

PRODUCT DESCRIPTION

Mystox LPL-40S is a weather resistant fungistat containing 40% fatty acid esters of pentachlorophenol for textile industry solvent system applications. This fungistat does not discolor cellulosic fabrics and is resistant to leaching. Fabrics treated with the recommended levels of Mystox LPL-40S will survive extended exposure to fungi without appreciable loss in tensile strength.

PHYSICAL PROPERTIES

% Solids	40 %
Specific Gravity	0.90 - 1.10
Weight per Gallon	9.0 lbs.
Appearance	Light brown solution

DIRECTIONS FOR USE

Fabrics treated with the recommended levels of Mystox LPL-40S will survive extended soil burial without appreciable loss of tensile strength, and will control mold and mildew organism so often associated with spotting and staining of fabrics. Mystox LPL-40S is not irritating to the skin at suggested application levels.

Mystox LPL-40S contains mineral spirits as the solvent and is compatible with any oil soluble system. Conventional padding equipment may be used after which the fabric can be dried on cans or on a frame.

Mystox LPL-40S is a mildew and mold, rot and decay fungistat, for use on non-clothing fabrics such as duck and rayon sateen. It is possible in the future it will be used on these fabrics in clothing items.

SUGGESTED LEVELS OF USE

Mystox LPL-40S should be used at a level of 2.5 - 5.0% based on the weight of the finished product.

HANDLING

Although Mystox LPL-40S has been accepted by the FDA for mildew control, it is still a concentrate. Care should be taken in its handling. Do not allow direct contact with the skin. Do not allow the product to be splashed in the eyes. If splashed in the eyes, wash thoroughly with copious amounts of water and seek immediate medical attention. Avoid contact with clothing and wash thoroughly after handling. Mystox LPL-40S may be harmful if swallowed.

STANDARD PACKAGE

Quarts; Gallons; 5 Gallons
EPA Registration No. 2829-95
Canadian Registration No. 12298
