This DISINFECTANT is effective against a variety of gram-positive and gram-negative bacteria and pathogenic fungi. This DISINFECTANT is also a residual bacteriostat on environmental hard surfaces, inhibiting the growth of odor producing bacteria in areas of high moisture and on moist surfaces when used regularly and as directed.

This DISINFECTANT is also an excellent deodorant. It is especially advantageous to control odors that are bacterial in origin.

This DISINFECTANT mixes readily with water and makes a clear, stable solution. In use dilution, it is non-corrosive and non-staining to plastic, vinyl, synthetics, enamel, tile and most common metals. Has a pleasant mint fragrance.
