

USE DAL-E-RAD 100 along drainage ditchbanks, rights-of-way, implement storage yards and similar non-crop areas where cultivation is not practical. Mix at the rate of 3-3/4 to 4-3/4 pounds of DAL-E-RAD 100 in 40 gallons of water and 2 pints of a suitable surfactant to treat one acre.

USE IN ACCORDANCE WITH DIRECTIONS, WARNING AND CAUTION

WARNING: Do not spray or allow to drift onto desirable flowers, trees, shrubs, vegetables, or into lakes or streams. Fogging sprays are less likely to drift. Do not store near fertilizer, fungicides, insecticides or seeds.

CAUTION: Do not get in contact with skin. If spilled on skin, wash off immediately with warm water and soap. Flush eyes with clean water. Avoid any inhalation of spray. Avoid contamination of food, feedstuffs, water and other water sources. Keep beyond reach of children and pets. Do not use in areas where children and domestic animals are present. Wash hands after use. If swallowed...

ANTIDOTE: If swallowed, induce vomiting at least once...

NON WARRANTY: This product is a registered pesticide... It is not a guarantee of performance... The user assumes all responsibility for the proper use of this product...

NET WEIGHT 11

DAL-E-RAD 100 POWDER FOR DALLISGRASS CONTROL IN BERMUDA TURF LAWNS

ACTIVE INGREDIENT	
Disodium Metharsenate	6.700%
INERT INGREDIENTS	33.000%
	TOTAL
Total Arsenic, as element, L	1.000%
all in water soluble form	2.667%
*Equivalent to 100% Disodium Metharsenate Hexahydrate	

CAUTION: Keep Out of the Reach of Children. See side panel for additional cautions.

USDA Reg. No. 25-111

DIRECTIONS

DAL-E-RAD 100 is a selective herbicide for the control of Dallisgrass in Bermuda Turf Lawns.

For best results, apply on the morning or evening of application.

Do not spray on windy days and do not spray on wet lawns. Water is essential for the action of the herbicide. Water thoroughly and evenly, especially on drought-stressed lawns and low soil moisture.

RECOMMENDED RATES TO TREAT ONE (1) ACRE

Mix 3 3/4 to 4 3/4 pounds of DAL-E-RAD 100 with 40 gallons of water and 2 pints of a suitable surfactant to treat one acre. For best results, apply on the morning or evening of application. Do not spray on windy days and do not spray on wet lawns. Water is essential for the action of the herbicide. Water thoroughly and evenly, especially on drought-stressed lawns and low soil moisture.

Before using any Herbicide, top and read the label.
