

DIRECTIONS FOR GENERAL WEED CONTROL

WEED-HOE 120 (MSMA) Liquid may be used along drainage ditch banks, rights-of-way, implement storage yards and similar non-crop areas. WEED-HOE 120 is effective for controlling JOHNSON GRASS, GOOSE GRASS, WATER GRASS, NUT GRASS, GREEN and YELLOW FOX TAIL, DALLIS GRASS and similar weeds.

RECOMMENDED RATES TO TREAT ONE (1) ACRE

- (1) Mix at the rate of 2 1/3 pints WEED-HOE 120 plus 2 pints of a suitable surfactant in 40 gallons of water.
Note: Follow mixing instruction as for cotton.
Apply entire mixture as a broadcast spray, thoroughly wetting foliage and stems of weeds. If regrowth occurs, a second application will be required.

DO NOT CONTAMINATE WATERS used by wildlife, aquatic life, domestic animals or for irrigation.

DO NOT GRAZE TREATED AREAS or feed livestock treated forage. Avoid storage near food products or feed.

CAUTION: Harmful if swallowed. Avoid contact with skin or breathing of spray mist. Keep children and domestic animals off treated areas until chemical is washed into soil. WASH HANDS AFTER USING.

ANTIDOTE: If taken internally, induce vomiting, call physician at once.

NON WARRANTY: Vineland Chemical Company and seller warrant that this material will conform to ingredients indicated on label, but make no other warranty implied or expressed. Neither Vineland Chemical Company nor seller shall be held responsible for personal injury, property damage or other loss resulting from the handling, storage or use of the product, whether or not in accordance with directions. Buyer assumes all risks and liability therefrom and accepts and uses the product on these conditions. No person is authorized to waive this notice.

PREPARATION FOR USE - COTTON

WEED-HOE 120 (MSMA) Liquid Herbicide used Post-Emergence for weed control in cotton and similar non-crop areas. WEED-HOE 120 will control JOHNSON GRASS, GOOSE GRASS, COCKLEBUR, NUT GRASS and DALLIS GRASS.

FOR BAND TREATMENT ON COTTON GROWN IN 30 INCH ROWS:

- (1) Mix at the rate of 2 1/2 pints of WEED-HOE 120 plus 2 pints of a suitable surfactant in 10 gallons of water. Add WEED-HOE 120 to water in spray tank. Thoroughly mix by agitation, add surfactant, and complete mixing by recirculating solution prior to application.
- (2) Apply at the rate of one (1) gallon of the mixture for each one (1) inch of band width. (13,068 ft. long).
 Example: For 12 inch band, apply 12 gallons of the mixture per acre.
- (3) Apply as a directed basal spray to weeds when cotton is 3 inches high and up to first bloom. Do not apply after first bloom opens. Adjust nozzles on spray equipment to allow thorough wetting of weeds with no contact with cotton foliage. Use fan type nozzle, low volume-sprayer, 25 lbs. or less pressure. Any spray equipment may be modified to apply WEED-HOE 120. Clean equipment after use by flushing with water. Run rinse water in area away from domestic water sources.

Two applications may be made. Should regrowth occur, retreat at the above rates 1 to 3 weeks after first application.

DO NOT REUSE CONTAINER.
