

CHEM-AX

Left Panel

BORE HOLE INJECTION FOR HARDWOODS:

For trees below six inches d.b.h. inject seven milliliters of Chem-Ax per hole in holes spaced six inches apart around the trunk circumference at 3 feet height or below.

Trees six to ten inches d.b.h. require eight milliliters of Chem-Ax per hole in holes spaced six inches apart around the trunk circumference at 3 feet height or below.

Trees over ten inches d.b.h. require eight milliliters of Chem-Ax per hole in holes spaced six inches apart around the trunk circumference at 3 feet height or below.

Forked trees require individual treatments.

BORE HOLE INJECTION FOR CONIFERS:

Trees below six inches d.b.h. require five milliliters of Chem-Ax in a 1/2 to 3/4 inch hole in the trunk at 3 feet from base or below.

Trees six inches to ten inches d.b.h. require seven milliliters of Chem-Ax in each of two holes in the trunk at 3 feet from base or below.

Trees over 10 inches d.b.h. require eight milliliters of Chem-Ax in separate holes spaced six inches apart around the trunk circumference at 3 feet from base or below.

Forked trees require individual treatment.

CARE OF EQUIPMENT:

Chem-Ax is entirely water soluble. Wash all injection equipment thoroughly after use to avoid corrosion of metal parts.

Chem-Ax is manufactured by Vineland Chemical Company, Vineland, New Jersey.
