

**CRYSTAL POOL ALGAECIDE**

**DIRECTIONS FOR USE**

When Crystal Pool Algaecide is used as directed, it will kill and prevent development of Chlorella pyrenoidosa (green), Phormidium inundatum (black algae), Phormidium retzii (Square D algae), Lyngba versicolor (blue-green) and other swimming pool algae.

Note: Kill, control and/or Destroy refer to initial dose. Prevent development, Suppress growth, Inhibit refer to maintenance dose. Crystal Pool Algaecide does not contain any mercury or other heavy metals and will not harm pool equipment. Crystal pool Algaecide is compatible with most commonly used swimming pool chemicals but should not be mixed with soap or other cleaners or premixed with other watertreating chemicals. Crystal Pool Algaecide works best when added by itself directly to pool water.

Caution: Harmful if swallowed from container. Crystal Pool Algaecide is highly concentrated, should be flushed from skin and eyes with water if accidentally splashed on them directly from container. Get medical attention should irritation persist. Crystal Pool Algaecide is not a food stuff and should not come in contact with food.

Concentrated Swimming Pool Algaecide ( and pool-side surface germicide\*) Keeps pool water clear and free of growing Algae. Reduces Chlorine Demand- Controls algal slime.

Active Ingredients:.....8.4%  
n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides  
  
n-di-alkyl (60% C14, 30% C16, 5% C12, 5% C18) methyl benzyl ammonium chlorides....1.6%  
  
Inert Ingredients..... 90%  
100%

Crystal Pool Algaecide is a concentrate and should be diluted before using.

Net. contents: 1 gallon USDA reg. NO.

Crystal Chemical Corp.  
508 East 118th Street  
New York City

CAUTION: Keep out of reach of children. See other warnings on side panel.

\*Optional: Recommend if desired.

Initial Dose: 1 gallon Crystal Algaecide to 40,000 gallons of water.  
Maintenance Dose: 1 quart Crystal Pool Algaecide to 40,000 gallons of water.  
Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, the initial dose should be repeated within 48 hours after the killed algae are removed from the pool.  
Maintenance dose should be added at least once every 7 days. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.  
If makeup water is added at the rate of more than 1% per week of pool capacity, add one quart of Crystal Pool Algaecide for each 10,000 gallons of fresh makeup water added per week. When the swimming season is over, add one gallon of Crystal Pool Algaecide to 40,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the Winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.  
Optional: For use as a pool-side surface germicide.  
After cleaning surfaces, use 1 oz. of Crystal Pool Algaecide to 4 gallons of water for sanitizing or 1 oz. Crystal Pool Algaecide to 2 gallons of water for disinfecting. At these dilutions Crystal Pool Algaecide will also deodorize surfaces efficiently.
