

# Calgon®

## Disposable Paper Diapers—B

Treated with Biochek 60 throughout the diaper. This gentle yet effective treatment retards bacterial growth in the wet diaper. Because Biochek 60 is present in all fiber layers, not just in the top liner, it can readily contact germs within the diaper. This unique presence of Biochek 60 throughout the diaper can be quite advantageous, particularly when pockets of urine tend to accumulate in bottom portions of a diaper.

### SOFT – HIGHLY ABSORBANT – WET STRENGTH

- Contains a powerful bacteriostat.
- Treated to inhibit growth of many germs in the diaper and minimizes their harmful by-products.
- Keeps diaper smelling sweet.
- Helps control growth of a broad spectrum of germs including most of the encountered types in urine.
- Keeps diaper soft, soothing and sweet smelling.
- Hygienically fresh smelling.

**CAUTION:** May cause skin sensitization. Discontinue use and see a physician if swelling or skin discolorations develop.

**Active Ingredients:**  
Dodecylguanidine hydrochloride\*..... 0.06%  
**Inert Ingredients**.....99.94%
