

# FULLSAN

## Quaternary Germicidal Cleaner

### ACTIVE INGREDIENTS

	% By Weight
Sodium Carbonate .....	3.0
n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18)	
dimethyl benzyl ammonium chlorides .....	1.6
n-Alkyl (68% C12, 32% C14)	
dimethyl ethylbenzyl ammonium chlorides .....	1.6
Tetrasodium Ethylenediamine Tetraacetate ..	1.0
	7.2

### INERT INGREDIENTS

ADAC Use Dilution Confirmation Test

Kills *Staphylococcus aureus*

Kills *Salmonella choleraesuis*

Kills *Pseudomonas aeruginosa*

ADAC (Fungicidal Test)

Kills *Trichophyton interdigitale*

### PRECAUTIONARY STATEMENTS:

Hazard to Humans and Domestic Animals.

### WARNING: KEEP OUT OF REACH OF CHILDREN.

Causes eye and skin irritation.  
Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

### STATEMENT OF PRACTICAL TREATMENT

In case of contact: Immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, do not induce vomiting. Drink large quantities of fluid and call a physician immediately.

### FULLSAN

FULLSAN is a low sudsing cleaner that kills a wide range of Gram-positive and Gram-negative bacteria and fungi at a 1:64 dilution. FULLSAN contains a blend of powerful "quat" type germicides and a biodegradable detergent that disinfect hard, nonporous surfaces contaminated by bacteria.

Designed for use by hospitals, schools, institutions and other public facilities. Cleans and disinfects hard, nonporous surfaces such as floors, walls, table tops, bed frames, tubs, tile surfaces, basins and telephones. Use FULLSAN wherever the control of infectious bacteria is essential to environmental sanitation.

### DIRECTIONS FOR USE:

It is a violation of the federal law to use this product in manner inconsistent with its labeling.

For Disinfecting: Apply solution of two ounces FULLSAN to one gallon of water (1:64). Where heavy build-up exists, preclean with a separate 1:64 solution of FULLSAN, giving special attention to thorough cleaning. When Pseudomonicidal product is required, use 3 oz. per gallon.

To disinfect against the spread of athlete's foot fungi (*Trichophyton interdigitale*) in areas commonly contacted by bare feet (showers, locker rooms, pools), apply freely a 1:64 solution of FULLSAN.

For Light Cleaning and Sanitizing: Apply solution of one ounce FULLSAN to one gallon of water (1:128) to all surfaces listed above.

To Sanitize and Deodorize (food handling equipment): FULLSAN is authorized by the U.S.D.A. for use in federally inspected meat and poultry plants. Wherever food and food products are processed, packaged, stored, prepared, and served: Remove or carefully protect all food products and packaging materials. Dilute one ounce FULLSAN in five quarts water (1:160) and apply; or dip. RINSE TREATED FOOD CONTACT SURFACES WITH POTABLE WATER PRIOR TO REUSE.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a dry place no lower in temperature than 50°F or higher than 120°F. Keep from freezing.

CONTAINER DISPOSAL: Do not reuse empty container. Triple rinse empty container. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities. Plastic containers may be disposed of in a sanitary landfill, incinerated, if allowed by local authorities, by burning. If burned stay out of smoke.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to the label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
