WARNING: This product contains chemicals which are known to the State of California to cause cancer, birth defects, or other reproductive harm.

INDUSTRIAL PRODUCTS DIVISION
THE FULLER BRUSH COMPANY, 1000 S. FULLER ST., CHICAGO, ILL. 60608

GENERAL FACTS ABOUT FULLPHENE II—A highly effective synthetic detergent with outstanding cleansing and sanitizing characteristics.

Is soapless—dilutes clear—will not cloud.

Works well in any water—hard or soft—hot or cold.

In use, dilution is non-staining.

Gives a clean refreshing fragrance.

Excellent for use as a total cleaner for the maintenance of industrial washrooms, for the cleaning, sanitizing and deodorizing of school and clubhouse locker rooms and for use in hotels and motels or other similar institutions where sanitizing must be combined with effective cleaning.

Used FULLPHENE II solution may be flushed through toilets, urinals, and slop sinks to further reduce odors.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crush. Bury in safe place.

DIRECTIONS—When sanitizing is the only requirement, Fullphene II is highly effective when used 1 ounce per gallon of water (1-128).

For most everyday jobs requiring moderate cleaning and sanitizing, use 2 ounces of Fullphene II per gallon of water (1-64).

For heavy-duty cleaning and sanitizing, use 6 ounces of Fullphene II per gallon of water (1-20).

Fullphene II is so effective as a cleaner it may also be used for stripping wax at this same dilution of 1-20. Where old wax buildups pose a problem, add a cup of household ammonia to the solution.

HOW TO APPLY—Fullphene is easy to apply and safe to use on environmental surfaces, such as walls and all types of floors including properly sealed wood floors. Apply with mop to floors. For cleaning walls, use a sprayer (Fuller #9077) and a sponge. If there will be contact with skin, use rubber gloves.
