Do not combine emulsifiable liquids with wettable powders in the same spray tank unless previous use of the materials being combined has proven them to be physically compatible.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not apply where run-off is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Shrimp and crab may be killed at application rates recommended on this label. Do not apply where these are important resources. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Agricultural Extension Service.

STATEMENT OF PRACTICAL TREATMENT

Note to Physician: This product may cause cholinesterase inhibition. Atropine is antidotal.² PAM may be effective as an adjunct to atropine.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Apply specified rate per acre in sufficient water to thoroughly cover plant surfaces with ground driven equipment or aircraft. When applied by air use a minimum of 5 gallons of water per acre — by ground a minimum of 10 gallons per acre.

STORAGE AND DISPOSAL

1. **Prohibitions** — Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.
2. **Pesticide Disposal** — Pesticide spray mixture or residue that cannot be used or chemically reprocessed should be disposed of in a land fill approved for pesticides or buried in a safe place away from water supplies.
3. **Container Disposal** — Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved land fill or bury in a safe place.
4. **General** — Consult Federal, State or Local Disposal Authorities for approved alternative procedures.

RECOMMENDATIONS FOR USE
