

BEN-SUL 60 DUST

SPECIALLY GROUND AND SCREENED

This Dusting Sulfur is especially ground for use as a dust to control the following plant diseases and insects.

CLOVER MITE (Almond Mite) on Alfalfa.

POWDERY MILDEW on Beans, Currants, Gooseberries, Grapes, Peas, and Peaches.

Apply when disease appears. On Grapes, dust when the shoots are about six inches long—give second application just before blossoms open.

RED SPIDER on Beans.

RUST on Beans.

ASPARAGUS RUST.

BROWN ROT on Peaches, Plums and Prunes. Use as a preventive measure. Apply when fruit starts to ripen.

AVOCADO MITE, ALMOND MITE, COTTON MITE, EUROPEAN RED MITE, TOMATO MITE, PACIFIC MITE (Red Spider) on Almonds, Beans, Cotton, Currants, Gooseberries, Figs, Hops, Peas, Plums, Prunes and Tomatoes. Consult your local agricultural authorities for specific recommendations as to dosage, time and number of applications.

THRIPS ON CITRUS FRUITS. Apply so as to give good coverage of trees. See local agricultural authorities for time of application.

CITRUS RED SPIDER and TWO-SPOTTED MITE on Citrus. Dust when infestation occurs.

KEEP OUT OF REACH OF CHILDREN!

CAUTION

General rules for application of sulfur are not always applicable and your local agricultural agent should be consulted for fully used. Apples, Cucurbits and certain other fruits and plants are injured by sulfur. Apples, Peas and Strawberries are susceptible to foliage burn under certain climatic conditions. Sulfur will cause injury to some fruits when applied within 2 weeks of an oil spray.
