RED-TOP

CHLORATE CONCENTRATE

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

WARNING: When using chlorate type of defoliant on cotton, crop damage may occur the following crop year on BARLEY, SAFFLOWER and SUGAR BEETS. To avoid damage do not exceed recommended rates and confine application to cotton and milo plants. Good deep tillage and plenty of water from rains and pre-irrigation will in most cases leach excess chlorate from the soil. Do not graze treated areas or feed gin waste to livestock.

STORAGE AND DISPOSAL

1. Prohibitions: Do not contaminate water, food or feed by storage or disposal.
2. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
3. Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
4. Storage: Store in original container only and keep sealed. Store in closed storage areas. Use caution when moving, opening, closing or pouring. Do not use, pour, spill or store near heat or open flame.

GROUND SPRAYERS: Use recommended amount of RED-TOP CHLORATE CONCENTRATE per acre, in 20 to 30 gallons of water. Six to eight nozzles per row are usually necessary to obtain good leaf coverage from ground sprayer application.

AIRPLANE APPLICATION: Use recommended amount of RED-TOP CHLORATE CONCENTRATE in 5 to 10 gallons of water per acre. Lower rate to be used only when plants and weather conditions are ideal for defoliation.

RECOMMENDATIONS FOR USE

Do not apply this product through any type of irrigation system.

COTTON: Use 2 to 2.7 gallons per acre. Immaturity and drought of plants are the most frequent causes of unsatisfactory defoliation. Under most growing conditions proper maturity is indicated by the green foliage color becoming lighter and tinged with red, and by a definite reddening of the stems. Apply Defoliant 10 to 21 days before anticipated picking date. Do not defoliate when plants are suffering from drought as evidenced by wilt condition of the plant. Cotton suffering from an alkali soil condition should not be defoliated. Thorough coverage of the plant is essential, whether applied by airplane or ground sprayer.

MIL0 (SORGHUM): When weather and growing conditions cause milo to mature and dry slowly, use 2 to 2.7 gallons per acre to reduce moisture content in the field. Make application 7 to 10 days before harvest.

ACTIVE INGREDIENTS:

Sodium Chlorate

INERT INGREDIENTS

This product contains 1.84 lbs. of Sodium Chlorate per gallon.

EPA Reg. No. 2935-404-AA

KEEP OUT OF REACH OF CHILDREN CAUTION

CAUTION: Avoid skin contact. Wash clothing and spray equipment immediately after use. Avoid contamination of feed and foodstuffs. Keep opened containers away from children.

Do not contaminate water by cleaning of equipment, or disposal of rinsate.

DO NOT USE THIS PRODUCT FOR ANY PURPOSE OTHER THAN THAT RECOMMENDED ON THIS LABEL.

DO NOT ALLOW THIS PRODUCT TO DRIFT FROM THE AREA OF APPLICATION.

NOT FOR USE OR STORAGE IN OR AROUND THE HOME.

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

DO NOT REUSE EMPTY CONTAINERS. DISPOSE OF IN ACCORDANCE WITH LOCAL REGULATIONS.
