GENERAL INFORMATION

NU-FLOW ND is recommended for use at time of planting as a seed treatment to protect against seed and seedling rots, damping-off and shroshin (Rhizoctonia, Pythium) impairing good seed germination and seedling development of cotton. NU-FLOW ND is a ready-to-use flowable that can be pumped or poured directly into the cotton seed treater.

Label Treated Seed: "This seed is treated with NU-FLOW ND fungicide. Do not use for food, feed, oil production or any other purpose except planting." In California, do not graze plants grown from treated seed. Add appropriate information for any other chemical treatment.

Always use NU-FLOW ND with an EPA-approved dye or colorant that imparts an unnatural color to the seed.

STORAGE AND DISPOSAL

1. Prohibitions: Do not contaminate water, food or feed by storage or disposal.
2. Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
3. Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
4. Storage: Store in original container only and keep sealed. Store in closed storage areas. Use caution when moving, opening, closing or pouring.
