NU-FLOW D is recommended for use at time of planting as a supplemental seed treatment to protect against seed/seedling rots, damping off and soreskin (caused by Rhizoctonia, Pythium), which impair good seed germination and seedling development of cotton and beans. NU-FLOW D is a ready-to-use flowable designed to be pumped or poured directly into the seed treaters.

**LABEL TREATED SEED:** "This seed is treated with Chloroneb Fungicide "NU-FLOW D". Do not use for food, feed, all production or any other purpose except planting. Add appropriate information for any other chemical treatment.

**NOTE:** Do not use treated seed for food, feed, or oil purposes. Do not graze treated beans within 45 days of planting.
