GENERAL INFORMATION

NU-FLOW D is recommended for use at time of planting as a supplemental seed treatment to protect against seed/seedling rots, damping off and soreshin (caused by Rhizoctonia, Pythium), which impair good seed germination and seedling development of cotton and beans. NU-FLOW D is a ready-to-use flowable designed to be pumped or poured directly into the seed treaters.

NOTE: Federal Law requires that bags containing treated seed shall be labeled with the following information: "This seed has been treated with WILBUR-ELLIS NU-FLOW D fungicide. Do not use treated seed for food, feed or oil purposes. In California, do not graze plants grown from treated seed. In other areas, do not graze treated beans within 45 days of planting."
