#### GENERAL INFORMATION

WILBUR-ELLIS MCPA SODIUM SALT is selective on Broadleaf Weeds only, and has no effect on cereal grains at the recommended rates.

WILBUR-ELLIS MCPA SODIUM SALT is a very slow acting systemic herbicide. This property allows the chemical to translocate into the root system before the tops are killed. Other chemicals do not kill this slow, effective kill without sterilizing the soil.

WILBUR-ELLIS MCPA SODIUM SALT is similar in its general behavior to the 2,4-D compounds. However, research to date indicates that MCPA Sodium Salt is more selective for Annuals under certain conditions.
