**PRECAUTIONARY STATEMENTS.
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

WARNING

Causes eye irritation. Do not get in eyes. Avoid contact with skin or clothing. Harmful if swallowed, inhaled, or absorbed through the skin. Do not contaminate food or feed.

STATEMENT OF PRACTICAL TREATMENT

If swallowed do not induce vomiting. Drink milk, egg whites or gelatin. If not available, drink plenty of water. If inhaled remove victim to fresh air. If on skin, wash with plenty of soap and water. Get medical attention if skin irritation persists. If in eyes, wash with water for at least 15 minutes and seek medical attention.

Note To Physician: There is no specific antidote. If ingested do not induce emesis and take care to avoid aspiration of stomach contents during gastric lavage. Give a saline laxative and supportive therapy.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not contaminate water used for irrigation or domestic purposes. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near heat or open flames.

STORAGE AND DISPOSAL

Store in original container only away from heat or flame. Do not reuse empty container. Wrap container and put in trash collection.

Neither Wilbur-Ellis Co. nor the Seller MAKES ANY REPRESENTATIONS OR WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, WITH RESPECT TO THE CONTENTS HEREOF, WHETHER AS TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ANY OTHER MATTER, EXCEPT AS INDICATED ON THIS LABEL. Neither Wilbur-Ellis Co. nor the Seller shall be liable for any injury, damage or loss resulting from the handling, storage or use of this product not in strict accordance with the directions given hereon.

NON-SELECTIVE WEED KILLER

TREATS 1000-1500 SQ. FT.

Kills broadleaf weeds, grasses, and woody plants by contact and root absorption - for up to one year. For use on walks, driveways, gravelled areas, parking lots, firebreaks, around homes & playgrounds.

DIRECTIONS FOR USE

It is in violation of Federal Law to use this product in a manner inconsistent with its labeling.

Observe all cautions and warnings in the handling of this material. Use only as directed. Read the label thoroughly before using. Non-Selective Weed Killer is a general herbicide with fast-acting double killing action - it kills by contact and by root absorption. Root killing action on deep rooted perennials and some woody plants does not normally occur until rain, or applied moisture, carries the active ingredients down to the root zone.

Keep Children and Pets away from treated areas until these areas are dry.

Non-Selective Weed Killer is recommended for killing existing weeds and grasses, and to prevent regrowth on walks, patios, driveways, black top and gravelled areas, playgrounds, and for creating firebreaks around homes and other structures on potential brush fire areas. Do not apply Non-Selective Weed Killer directly or allow to come in contact with foliage stems, trunks or roots of desirable plants. Do not apply within the drip line of trees or close to desirable trees, shrubs or plants where leaching may cause contact with their roots. Do not apply to valuable parts of turf. Do not use on ground where seepage may injure valuable plants. Do not use on areas where replanting may be required within a one year period. May stain concrete or other similar materials.

MIXING AND USING THE SPRAY. Measure the required amount of Non-Selective Weed Killer directly into sprayer or sprinkling can and then add the needed quantity of water and stir vigorously. The finished spray material tends to separate on standing and it therefore should be gently agitated from time to time while it is being applied. For control of heavy brush, deep-rooted perennials, woody plants, and tall weeds: Use 1 quart of Non-Selective Weed Killer to 2 gallons of water and apply to 250 square feet. For smaller areas, apply at the rate of 1 ounce (2 tablespoons) Non-Selective Weed Killer to 8 ounces of water to 8 square feet (2'x4').

For control of existing annual weeds and grasses: Use 1 quart of Non-Selective Weed Killer to 3 gallons of water and apply to 375 square feet. For smaller areas, apply at rate of 1 ounce (2 tablespoons) Non-Selective Weed Killer to 12 ounces of water to 12 square feet (3'x4').

Two days after applying Non-Selective Weed Killer, water the treated area deeply to increase plant absorption. One treatment normally provides a control for a full season. Repeat application if necessary. If longer lasting control is desired, use one quart of Non-Selective Weed Killer to 2 gallons of water and apply to 125 square feet. For smaller areas, apply at rate of 1 ounce (2 tablespoons) Non-Selective Weed Killer to 8 ounces of water to 4 square feet (2'x2').

FOR SPOT TREATMENT of woody plants such as Poison Oak, Honeysuckle, Blackberry, and Bermuda Grass outcroppings on driveways, patios, and parking lots, apply at the rate of 1 quart of Non-Selective Weed Killer mixed in 2 gallons of water. Spray all exposed parts of plants and saturate soil around base. Follow with deep watering. Apply with tank sprayer or with a sprinkling can.
