**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION**

See side panel for additional precautionary statements. →

German's® - Reg. TM of German's Inc.

**GENERAL INFORMATION** (Continued from opposite panel)

1-Naphthaleneacetic Acid Vitamin B1 Solution is especially designed to hasten the development of bare-root roses, fruit trees and shade trees and benefits bedding plants, new seedlings and all trees and shrubs that have been moved to new locations. It helps plants become established quickly and insures vigorous growth.

The soil penetrant and wetting agent added, reduces the surface tension of soil and allows the material to gain easy access to root area where it uniformly spreads over the root surface bringing them the proper stimulant for renewed growth.

EPA Reg. No. 2935-444 EPA Est. No. 2935-CA-1

**NET CONTENTS: 1 GALLON**  
**(128 FL. OZ.)**

Wilbur-Ellis Company, P. O. Box 16458, Fresno, CA 93755

Stimulates roots. Hastens development of bare-root roses, fruit & shade trees. Benefits bedding plants. Helps plants become established quickly and insures vigorous growth. For use on:

ROSES

TRANSPLANTED FLOWERS & SHRUBS

FRUIT TREES & SHADE TREES

HOUSE PLANTS & BEDDING PLANTS

**PRECAUTIONARY STATEMENTS**  
**HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS**  
**CAUTION:**

Harmful if swallowed. Avoid contact with skin, eyes and clothing in case of eye contact. Flush eyes with plenty of water. Wash thoroughly after handling. Remove and wash contaminated clothing before reuse.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is concentrated and must be diluted before making applications. Mix one tablespoonful of Vitamin B1 Solution into one gallon of water. At time of transplanting, apply mixture to bare roots and soil thoroughly saturating the plant's root area. Plants will not be damaged if larger volumes of diluted solutions are used.

Transplanted shrubs, trees, flowers, rooted cuttings, potted plants and house plants should be treated once a week until the plants are satisfactorily established. Apply mixture to soil around base of plant above root area. Subsequent monthly applications are recommended.

1-Naphthaleneacetic Acid Vitamin B1 Solution is a root stimulant and should not be applied to the plant's foliage as a fertilizer or plant food.

**STORAGE AND DISPOSAL**

Store in original container only in a cool, dry location away from children. Do not reuse empty container. Wrap container and place in trash collection.

**GENERAL INFORMATION**

This material contains a beneficial hormone-like chemical that stimulates the quick formation of new root hairs and revitalizes the delicate feeder roots that are often damaged in transplanting.
