Fresno, California 93704-2876

Dear Ms. Striebich:

Subject: Label Amendment - Add "Non-Bearing" to Fruit Trees
Black Leaf Vitamin B1 Solution
EPA Reg No 2935-444
Your Submission Dated July 18, 1994

The Amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, subject to the following comments:

- (1) Change Active Ingredients to "Active Ingredient"
- (2) Align the decimal points for the active, inert and total ingredients.

A stamped copy is enclosed for your records. Please submit 2 copies of final printed labeling before you release the product for shipment.

Sincerely,

LSI

Cynthia L. Giles-Parker

HAZARDS TO HUMANS AND
DOMESTIC ANIMALS
CAUTION

Avoid contact with eyes, nose, mouth, and skin. Wash thoroughly with soap and water after use. Do not eat, drink, or smoke while using this product.

DIRECTIONS FOR USE

Apply to soil around base of plants. For bare-root plants, apply to soil in hole. For potted plants, apply to soil in pot. For bedding plants, apply to soil in tray.

Apply to soil around base of plants. For bare-root plants, apply to soil in hole. For potted plants, apply to soil in pot. For bedding plants, apply to soil in tray.

STORAGE AND DISPOSAL

Store in original container in a cool, dry place. Do not use if container is damaged. Do not reuse empty container. Place in trash collection.

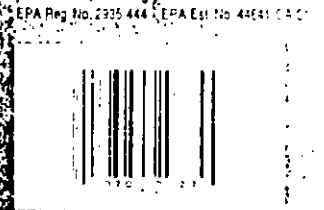

GENERAL INFORMATION

This product contains a chemical hormone. It is not a fertilizer. It does not contain any insecticides or fungicides. It is not a weed killer.

ACCEPTED

with COMMENTS
 in EPA Letter Dated

Vitamin B1 Solution is especially designed to hasten the development of bare-root roses, fruit and shade trees and benefits bedding plants, new seedlings and all trees and shrubs that have been moved to new locations. It helps plants become established quickly and insures vigorous growth. The soil penetrant and wetting agent included reduces the surface tension of soil and allows the material to gain easy access to root area where it uniformly spreads over the root surface binding them the proper stimulus for renewed growth.
