PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through the skin. Avoid contact with eyes, skin or clothing. Avoid breathing vapors or spray mist.

If swallowed, induce vomiting immediately by giving two glasses of water and sticking finger down throat. NEVER give anything by mouth to an unconscious person. Seek medical attention.

In case of contact, flush eyes with plenty of water for at least 15 minutes. Seek medical attention.

Wash exposed skin gently with plenty of soap and water.

Keep children and domestic animals off treated areas until this material has been washed into the soil.

Wear protective clothing when handling or applying this product including long pants, long-sleeve shirt, and impermeable gloves and boots. Mixer-loaders should include an apron and full-face shield when handling or mixing concentrate. Flagmen should be fully protected during spray operations or mechanical flagmen used. Pilots and ground spray rig applicators should wear a mask or respirator approved by the Mining Enforcement and Safety Administration and the National Institute for Occupational Safety and Health.

ENVIRONMENTAL HAZARDS

DO NOT apply directly to water. DO NOT feed treated foliage to livestock or graze treated areas. DO NOT spray or allow drift onto vegetables, ornamentals or other desirable plants. DO NOT apply when weather conditions favor drift from target area. DO NOT contaminate water by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL

DO NOT contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: DO NOT reuse empty container. Triple rinse (or equivalent) and offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

READ ENTIRE LABEL BEFORE USING THIS PRODUCT
GENERAL INFORMATION

TIDE SOLO-6C HERBICIDE is useful for selective post-emergent weed control, particularly for grassy weeds. Its phytotoxic properties are quickly inactivated on contact with soil. It is a combination of herbicide and surfactant. It is unnecessary to add any other surfactant to the spray solution. Best results are obtained on young actively growing weeds at air temperatures above 70° F.

MIXING INSTRUCTIONS

TIDE SOLO-6C HERBICIDE is completely water soluble. Fill the spray equipment tank about half full with water and add the required amount of herbicide with agitation. Finish filling the tank with water and apply. After use, clean equipment thoroughly by flushing with water. DO NOT store spray solution in tank for a prolonged period. Although TIDE SOLO-6C HERBICIDE is only moderately corrosive DO NOT use in galvanized or aluminum equipment.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation equipment.

COTTON: TIDE SOLO-6C HERBICIDE is useful as a preplant and/or directed application in cotton for post-emergent control of weeds and grasses, such as Johnsongrass, nutsedge, dallisgrass, cocklebur, ragweed, sandbur and puncturevine. It should be applied at the rate of 1 1/3 gallon per acre. Mix 3 quarts of TIDE SOLO-6C HERBICIDE in 90 gallons of water. DO NOT add any surfactant to the spray solution. Apply spray solution at 40 gallons per treated acre. Weed control is most effective at temperatures above 70° F. For band application in 40 inch rows, apply 1 gallon of spray solution per inch of band width per acre to cotton.

PREPLANT APPLICATION: If planting of cotton has been delayed and weeds have emerged, use one preplant application. Cotton may be planted immediately following the preplant application.

POST-EMERGENT APPLICATION: In cotton previously treated with one application of DSMA a directed application of SOLO-6C HERBICIDE may be applied, if needed. In cotton not treated with DSMA, two post-emergent directed applications of SOLO-6C HERBICIDE may be applied.

Directed Applications: Direct the spray solution to the base of the cotton plant. Nozzles should be placed so as to avoid spraying the cotton foliage, but to give good coverage of the weeds and grasses. If regrowth occurs, make a second application about 1 to 3 weeks after the first. Slight burning and a reddish discoloration of the cotton leaf may occasionally occur following directed application, but the cotton plant will develop normally. Make directed applications only when cotton is 3 inch high to first bloom. DO NOT apply after first bloom.

CITRUS-BEARING AND NON-BEARING (Except Florida): TIDE SOLO-6C HERBICIDE is useful as a directed application in citrus orchards, such as orange, grapefruit, tangerine, lemon and lime orchards. It should be applied at the rate of 1 1/3 to 2 1/3 gallons per acre. MIX TIDE SOLO-6C HERBICIDE at the rate of 1 1/3 gallon in 50 gallons of water. Apply as a directed spray in interspaces and around base of trees. Spray unwanted vegetation to just short of run-off. If regrowth occurs, reapply as required; however, DO NOT exceed 3 applications per year. DO NOT allow spray solution to contact fruit, leaves, stems or bark. Use a shield, if necessary, for nursery plantings or young trees.

AGRICULTURAL PLANTINGS: TIDE SOLO-6C HERBICIDE is useful as a directed application in non-bearing vineyards, and in non-bearing deciduous fruit and nut orchards, such as apple, peach, pear, plum, prune, apricot, cherry, almond and walnut orchards. It should be applied at the rate of 1 1/3 to 2 1/3 gallons per acre.

Mix TIDE SOLO-6C HERBICIDE at the rate of 1 1/3 gallons in 50 gallons of water. Apply as a directed spray in interspaces and around base of trees or vines. Spray unwanted vegetation to just short of run-off. If regrowth occurs, reapply as required; however, DO NOT exceed 3 applications per year. DO NOT allow spray solution to contact leaves, stems or bark. Use a shield, if necessary, for nursery plantings or young trees. DO NOT apply around trees or vines from which fruit will be harvested within one year of treatment.

NON-CROP: TIDE SOLO-6C HERBICIDE is useful for control of Johnsongrass, nutsedge, dallisgrass, cocklebur, ragweed, sandbur, puncturevine and certain other weeds on drainage ditchbanks, rights-of-way fence rows, storage yards and similar non-crop areas. Mix TIDE SOLO-6C HERBICIDE at a rate of 6 to 12 pints in 100 gallons of water. Spray unwanted vegetation at a rate of about 50 gallons of spray solution per acre thoroughly to just short of run-off. Any spray equipment that gives good coverage may be used. Use spray equipment that gives good low volume coverage. If regrowth occurs, reapply as required. DO NOT contaminate waters used for domestic purposes, or by animals including wildlife and aquatic life, or water used for irrigation purposes.

LAWN AND ORNAMENTAL TURF: TIDE SOLO-6C HERBICIDE is useful for control of dallisgrass, sandbur, bahiagrass, nutsedge, crabgrass, chickweed and wood sorrel with little or no injury to tolerant lawn grasses. On new lawns, DO NOT treat until after three mowings. Tolerant grasses may be temporarily discolored. Zoysia, bluegrasses and Bermuda are quite tolerant. DO NOT use on St. Augustine or centipede. Mow lawns 1 to 1 1/2 inches high before treatment. Mix 1 1/3 fluid ounces (8 teaspoons) of TIDE SOLO-6C HERBICIDE in 2 1/2 gallons of water and apply to an area of 1,000 sq. ft. Spray thoroughly to wet all undesirable plants. Repeat applications, 10 to 14 days apart, may be needed for good control. DO NOT apply with hose-end applicators.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that this material conforms to its chemical description and is reasonable fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any use contrary to such directions. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY, INCLUDING ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO EXCEPT IN WRITING WITH A SPECIFIC REFERENCE TO THIS WARRANTY. In no event shall seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

"For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark."
