

MAY 15 1995

Ms. Joanne Striebich
Wilbur-Ellis Company
191 W. Shaw Ave, Suite 107
Fresno, CA 93704

Dear Ms. Striebich:

SUBJECT: Confidential Statement of Formula & Label Amendment
Amine 4
EPA Registration No. 2935-512
Your Application Dated March 15, 1995

I. The Agency has reviewed your revised Confidential Statement of Formula (CSF), dated March 16, 1995. The CSF is acceptable with the following corrections:

- 1. The Registration Number in item #4 is incomplete. The Registration Number should be 2935-512.
- 2. The Registration Number of the source product, shown in column #12, is incorrectly listed as "2280145". It should be "228-145".

A corrected copy of the CSF (Basic Formulation) has been placed in our file as part of the record for the subject product. Please correct your copies. This CSF supersedes the previously accepted CSF for this product.

II. The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, with the following provisions:

- 1. The label statement, "In Compliance with WPS", is not allowable and must be deleted.
- 2. Under the "Pesticide Disposal" instructions, you must add the phrase, "and may contaminate groundwater", at the end of the sentence which begins "Improper disposal of excess pesticide..." The corrected sentence should read, "Improper disposal of excess pesticide, spray mixtures, or rinsate is a violation of Federal law and may contaminate groundwater."

3. Under Precautionary Statements:

-add the heading, "Personal Protective Equipment", just before the Non-WPS Turf Uses section

-Under Non-WPS Industrial/Aquatic Uses, delete the statement, "There isn't any restriction on the annual maximum number of broadcast applications for Industrial/Aquatic uses."

4. You must delete the last sentence in the Agricultural Use Requirements box. The statement, "There isn't any restriction on the annual number of applications for Sod Farms.", is not allowable.

5. You must delete the last two sentences in the Non-Agricultural Use Requirements box. The statements, "No re entry restrictions for Industrial/Aquatic uses, nor non-crop uses of pastures, rangelands and forests, including brush control." and "There aren't any restrictions on the annual maximum number of applications for brush control.", are not allowable.

6. You must revise the directions for Spot Treatment in Non-Crops Areas. The rate must be changed to read "... use 1/4 pint of Amine 4 in 3 gallons of water ..."

7. You must add the following statement at the end of the Brush Control use directions: "Water within treated banks should not be fished."

A stamped copy is enclosed for your records. Please submit (one) final printed copy for the above mentioned label before releasing the product for shipment.

Sincerely yours,

Joanne I. Miller
Product Manager (23)
Fungicide-Herbicide Branch
Registration Division (7505C)

EPA Reg No 2935-512

□ EPA Est No

STORAGE AND DISPOSAL

Storage: Always store pesticides in a secured warehouse or storage building. Do not store near seeds, fertilizers, insecticides or fungicides. Store at temperature above 32°F. If allowed to freeze, rewarm to 40°F, recheck for quality before using. This does not alter this product. Containers should be opened in well ventilated areas. Keep container tightly sealed when not in use. Do not store in places where more than two pallets high are allowed to be stored by the manufacturer.

Pesticide Disposal: Pesticide wastes are toxic. If containers contain any pesticide, they should be marked to contain any spillage. Absorb and clean up all spills immediately with procedure on label. Place in marked labeled container for proper disposal. In proper disposal of excess pesticide, spray mixture should be placed in small Federal law. If these wastes cannot be disposed of by you, according to label instructions, contact your State Department of Environment and Pesticide Agency or the Hazardous Waste Reporting Agency for the EPA Regional Office for guidance.

Container Disposal: Do not reuse (or equivalent). Then offer for recycling or reuse. If no recycling or reuse is available, dispose in a secondary landfill or other approved disposal method in accordance with the label.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE: Causes moderate to severe damage. Do not get in eyes or on clothing. Avoid contact with skin. May cause moderate to severe burns. Do not use. Avoid contact with skin. Do not use. If the contents of this container are emptied, the probe must be rinsed before removal. If the contents of a non-refillable pesticide container are emptied, the probe must be rinsed before removal.

NON-WPS TURF USES: Applicators and other handlers who handle this pesticide for any use NOT covered by the Worker Protection Standard (40 CFR Part 170) - in general - only agricultural plant uses are covered by the WPS - must wear face shield, goggles or safety glasses and long pants, long sleeved shirt, socks, shoes and rubber gloves. It is recommended that safety glasses include brow and temple protection. In addition to the clothing and eye protection listed above, commercial mixers/loaders/applicators must wear chemical resistant in place of rubber gloves except when the product is applied to a golf course. After using this product, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. The maximum number of broadcast applications to turf per treatment site is 2 per year.

NON-WPS INDUSTRIAL/AQUATIC USES: When mixing, loading or applying this product or repairing or cleaning equipment used with this product, wear face shield or goggles and chemical-resistant gloves, long-sleeved shirt, long pants, socks and shoes. For aerial applicators in an enclosed cockpit and applicators applying this product from a tractor that has a completely enclosed cab, eye protection is not required. Wash hands, face and arms with soap and water as soon as possible after mixing, loading or applying this product. After work, remove all clothing and shower using soap and water. Do not reuse clothing worn during the previous day's mixing and loading or application of this product without cleaning first. Clothing must be kept and washed separately from other household laundry. There isn't any restriction on the annual maximum number of broadcast applications for Industrial/Aquatic uses.

WPS USES: Applicators and other handlers who handle this pesticide for any use covered by the Worker Protection Standard (40 CFR Part 170) - in general, agricultural plant uses are covered - must wear coveralls over short-sleeved shirt and short pants, waterproof gloves, chemical-resistant footwear plus socks, protective eyewear, chemical resistant headgear for overhead exposure and chemical resistant apron when cleaning equipment, mixing or loading. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instruction for cleaning/maintaining Personal Protective Equipment (PPE). If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. After each day of use, clothing or PPE must not be reused until it has been cleaned.

Engineering control statements: If this container is over one gallon and less than five gallons, mixers and loaders who do not use a mechanical system (probe and pump) to transfer contents of this container must wear coveralls or a chemical resistant apron in addition to the other required PPE. If the container is five gallons or more in capacity a mechanical system (probe and pump) must be used for transferring the contents of this container. If the contents of a non-refillable pesticide container are emptied, the probe must be rinsed before removal. If the mechanical system used for transfer is a probe and pump, the equipment must be used in the Worker Protection Standard (WPS) for agricultural uses. AMINE 4 (continued)

GRASSES IN CONSERVATION RESERVE PROGRAM AREAS

Use 1 to 4 pints of Amine 4 in up to 30 gallons of water per acre by air or ground equipment in spring or fall to control broadleaf weeds in grasses being grown for seed. Do not apply from early boot to the milk stage. Spray seedling grass only after the five leaf stage, using 3/4 to 1 pint per acre to control small seeding weeds. After the grass is well established higher rates of up to 4 pints can be used to control hard to kill annual or perennial weeds. For best results do not use on bentgrass unless grass injury can be tolerated.

NOTE: Suggest at least 2 gallons of water per acre by air and 5 gallons of water per acre by ground. Do not harvest or graze treated Conservation Reserve Program areas. Do not apply to grasses in the boot to dough stage if grass seed production is desired.

GRASS SEED CROPS: Use 1 to 4 pints in up to 30 gallons of water per acre by air or ground equipment in spring or fall to control broadleaf weeds in grasses being grown for seed. Do not apply from early boot to the milk stage. Spray seedling grass only after the five leaf stage, using 3/4 to 1 pint per acre to control small seeding weeds. After the grass is well established higher rates of up to 4 pints can be used to control hard to kill annual or perennial weeds. For best results do not use on bentgrass unless grass injury can be tolerated.

CONTROL OF SOUTHERN WILD ROSE: On roadsides and fencerows, use 1 gallon of Amine 4 plus 4 to 8 ounces of an agricultural surfactant per 100 gallons of water and spray thoroughly as soon as foliage is well developed. Two or more treatments may be required. On rangeland, apply a maximum of 2.1 quarts of Amine 4 per acre per application.

STONE FRUIT AND NUT ORCHARDS (Except in California): To control annual broadleaf weeds on the orchard floor, apply 3 pints per acre using coarse sprays and low pressure in sufficient volume of water to obtain thorough wetting of weeds. Treat when weeds are small and actively growing. Do not use on light, sandy soil.

NOTE: Do not apply (1) to bare ground as injury may result, (2) to newly established or young orchards. Trees must be at least 1 year old and in vigorous condition, (3) during bloom, (4) more than twice a year, (5) immediately before irrigation and withhold irrigation for 2 days before and 3 days after treatment. Also, do not allow spray to drift onto or contact foliage, fruit, stems, trunks of trees or exposed roots as injury may result. Do not graze or feed cover crops from treated orchards. Pre-harvest stone fruit within 40 days of application; nuts within 60 days of application.

FOR USE IN CROP RESIDUE MANAGEMENT SYSTEMS IN SOYBEANS (Preplant only)

GENERAL INFORMATION: Wilbur-Ellis Amine 4 is a herbicide that provides control of many emerged susceptible annual and perennial broadleaf weeds. Wilbur-Ellis Amine 4 spray may be applied prior to planting soybeans to provide further burndown control of susceptible annual and perennial broadleaf weeds and certain broadleaf cover crops such as those listed on this label. Wilbur-Ellis Amine 4 should only be applied preplant to soybeans in situations such as reduced tillage production systems, where emerged weeds are present. Apply only according to the application instructions given below. Do not use any tillage operations between application of Wilbur-Ellis Amine 4 and planting soybeans.

MIXING INSTRUCTIONS: Compatible crop oil concentrates, agricultural surfactants and liquid fertilizers approved for use in growing crops may increase the herbicidal effectiveness of 2,4-D on certain weeds and may be added to the spray tank. Read and follow directions and precautions on this label and on a label of adjuvant or fertilizer mixed with this product.

APPLICATION PROCEDURES: Apply using air or ground equipment in a 10 to 15 ft swath or prior to a 5 to 8 inch deep disk or moldboard plow. The 2,4-D component of Amine 4 is a preplant application and is not intended for use on any other crop.

APPLICATION TIMING AND USE RATES

2,4-D Equivalent (lb/ae)	Maximum Rate (pint/ae)	When to Apply (Days prior to planting Soybeans)
Amine 4	1 pint (16.8 lb/ae) (0.58 lb/ae/acre)	NOT LESS THAN 15 DAYS
	2 pints (33.6 lb/ae) (1.16 lb/ae/acre)	NOT LESS THAN 30 DAYS

WEEDS CONTROLLED: Annual: Birdbeak, Blueberry, Buttercup, smallflowered, Carolina geranium, Cowbird, common aster, night-flowered, (Clover red), Cocklebur, common, (Dan delon), Evening primrose, cutleaf, (Garlic wild), Horseweed or marestail, Ironweed, Lambsquarters, common, (Lettuce prickly), Marestail, yellow, annual, Mustard, wild, (Ox-eye wild), Pennycrest, field, (Peppergrass), Purslane, common, Ragweed, common, Ragweed, giant, Shepherdspurse, Smartweed, Pennsylvania, (Sawtooth), annual, Spiceweed, (Thistle, annual), (Thistle, field), (Vetch, a), (Vetch, hairy), (Viper, long, annual).

For complete label, partially visible at bottom.

Use 1 to 4 pints of Amine 4 in up to 30 gallons of water per acre by air or ground equipment in spring or fall to control broadleaf weeds in grasses being grown for seed. Do not apply from early boot to the milk stage. Spray seedling grass only after the five leaf stage, using 3/4 to 1 pint per acre to control small seeding weeds. After the grass is well established higher rates of up to 4 pints can be used to control hard to kill annual or perennial weeds. For best results do not use on bentgrass unless grass injury can be tolerated.

APPLICATION RESTRICTIONS AND PRECAUTIONS: Do not use on low organic sandy soils (pH 5.0-6.0). Apply a maximum of one application per growing season, regardless of the treatment rate. Do not apply Wilbur-Ellis Amine 4 when weather conditions such as temperature inversions or wind favor drift from treated areas to susceptible plants.

Do not use on low organic sandy soils (pH 5.0-6.0).

Apply a maximum of one application per growing season, regardless of the treatment rate.

Do not apply Wilbur-Ellis Amine 4 when weather conditions such as temperature inversions or wind favor drift from treated areas to susceptible plants.

Livestock Grazing Restriction: Do not feed hay, forage or fodder. Restrict livestock from grazing treated fields. Livestock should be restricted from feeding/grazing of treated cover crops.

In fields treated with Wilbur-Ellis Amine 4, plant soybean seed as deep as practical or at least 1.0 inch deep. Adjust the planter, if necessary, to ensure that planted seed is completely covered.

Do not apply Wilbur-Ellis Amine 4 prior to planting soybeans, if you are not prepared to accept the results of soybean injury, including possible loss of stand and yield.

Do not replant fields treated with Wilbur-Ellis Amine 4 in the same growing season with crops other than those labeled for 2,4-D use.

BROADLEAF WEED CONTROL IN NON-CROPLAND GRASS AREAS SUCH AS LAWNS, GOLF COURSES, CEMETERIES AND PARKS, AIR-FIELDS, RIGHTS-OF-WAY, FENCEROWS, ROADSIDES, VACANT LOTS, DRAINAGE DITCHBANKS, INDUSTRIAL SITES AND SIMILAR PLACES

Do not use on dichondra or other herbaceous ground covers. Do not use on creeping grasses such as bent except for spot treatment nor on freshly seeded turf until grass is well established. Reseeding of lawns should be delayed following treatment. With spring application, reseed in the fall. With fall application, reseed in spring. Legumes are usually damaged or killed. Thoroughly wet weeds when applying this mixture. Bindweed, White top, Perennial sow thistle, Blue-joint lily, Bur ragweed, Canada thistle, and other annuals perennials somewhat resistant to 2,4-D will require repeated treatments to kill.

Use 1/2 to 1 gallon of this product in 15 to 50 gallons of water per acre. Treat when weeds are young and growing well. On turf, apply a maximum of 4.2 pints of this product per acre per application per site. To control small areas of woody plants such as Willows, Honeysuckle, Virginia creeper, Alders and others susceptible to 2,4-D use 1/2 to 1 gallon in 100 gallons of water, spray thoroughly wet plants when in full leaf. Re-treat as necessary for control of regrowth and seedlings. In general, it is better to cut tall woody growth and spray suckers with 2,4-D at high.

SPOT TREATMENT IN NON CROPS AREAS: To control broadleaf weeds in small areas with a hand sprayer, use 1/2 pint of Amine 4 in 3 gallons of water and spray thoroughly wet plants.

TREE INJECTIONS (Pine Release): To control broadleaf weeds in small areas with a hand sprayer, use 1/2 pint of Amine 4 in 3 gallons of water and spray thoroughly wet plants. To control broadleaf weeds in small areas with a hand sprayer, use 1/2 pint of Amine 4 in 3 gallons of water and spray thoroughly wet plants. To control broadleaf weeds in small areas with a hand sprayer, use 1/2 pint of Amine 4 in 3 gallons of water and spray thoroughly wet plants.

AQUATIC APPLICATIONS

FOR AQUATIC WEEDS IN STILL LAKES, PONDS, DRAINAGE DITCHES AND MARSHES: Amine 4 is a preplant application and is not intended for use on any other crop. Use 1 to 4 pints of Amine 4 in up to 30 gallons of water per acre by air or ground equipment in spring or fall to control broadleaf weeds in grasses being grown for seed. Do not apply from early boot to the milk stage. Spray seedling grass only after the five leaf stage, using 3/4 to 1 pint per acre to control small seeding weeds. After the grass is well established higher rates of up to 4 pints can be used to control hard to kill annual or perennial weeds. For best results do not use on bentgrass unless grass injury can be tolerated.

62

797

AMINE 4 (continued)

Apply with low pressure (10 to 40 psi) power spray equipment mounted on truck, tractor or boat. Apply while traveling upstream to avoid accidental concentration or chemical into water. Spray when the air is fairly calm, 5 mph or less. Do not use on small canals (less than 10 cfs) where water will be used for drinking purposes.

BRUSH CONTROL

For control of brush on irrigation canals, ditches, and banks, apply 1 to 2 quarts of Amine 4 per acre in approximately 20 to 100 gallons of water per acre. Treat when weeds are young and actively growing before the bud or early bloom stage. For harder-to-control weeds, a repeat spray after 3 to 4 weeks using the same rates may be needed for maximum results. Apply no more than two treatments per season.

WOODY PLANT CONTROL To control woody plants susceptible to 4-D, apply 2 to 3 quarts of product per acre in 100 gallons of water. Wet all parts of the plants thoroughly, including stems and foliage to the point of runoff. Higher volumes of up to 400 gallons per acre are necessary where the brush is very dense and over 6 to 8 feet high. Applications are more effective when made on actively growing plants. Treatment should not be made during time of severe drought or in early fall when leaves lose the green color. Hard to control species may require re-treatment next season.

WEEDS AND BRUSH ON IRRIGATION CANAL DITCHBANKS — SEVENTEEN WESTERN STATES Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, New Mexico, Nevada, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming

For control of annual and perennial broadleaf weeds, apply 1 to 2 quarts of Amine 4 per acre in approximately 20 to 100 gallons of water per acre. Treat when weeds are young and actively growing before the bud or early bloom stage. For harder-to-control weeds, a repeat spray after 3 to 4 weeks using the same rates may be needed for maximum results. Apply no more than two treatments per season.

For woody brush and patches of perennial broadleaf weeds, mix one gallon of Amine 4 in 150 gallons of water. Wet foliage thoroughly using about one gallon of solution per square rod.

SPRAYING INSTRUCTIONS Apply with low pressure (10 to 40 psi) power spray equipment mounted on truck, tractor or boat. Apply while traveling upstream to avoid accidental concentration or chemical into water. Spray when the air is fairly calm, 5 mph or less. Do not use on small canals (less than 10 cfs) where water will be used for drinking purposes.

Be sure you spray with water sufficient to wet all plant surfaces and foliage. The spray should be applied to the stems and foliage. When spraying, do not allow the spray to drift onto desirable crops. Do not spray in water soft areas. Do not spray in areas where the spray will be used for drinking purposes. Do not spray in areas where the spray will be used for drinking purposes.

Amine 4 & Garlon® Tank Mix

RIGHT OF WAY To control susceptible perennial broadleaf weeds, apply 2 quarts of Amine 4 per acre in approximately 20 to 100 gallons of water per acre. To control woody species, use a combination of 2 gallons of product per acre and 2 quarts of Garlon® 3A herbicide per acre. For ground application, apply in 20-400 gallons of water, depending on the height of the weeds and brush. Use the higher volumes of up to 400 gallons per acre for dense brush 6 feet tall or higher. For aerial application, use 10-30 gallons per acre total spray volume. Garlon® is a registered trademark of Dow Chemical.

Local conditions may affect the uses of this chemical as shown on this label. Consult State Experiment Station or Extension Service Weed Specialist for specific recommendation for local weed problems and for information on possible lower dosages.

POPLAR/COTTONWOOD TREES GROWN FOR PULP - BROADLEAF WEED CONTROL

1. WILBUR-ELLIS AMINE 4 may be applied through wick applicators or conventional ground sprayers (excluding irrigation systems).
2. Do not allow WILBUR-ELLIS AMINE 4 to contact leaves of the tree.
3. Use ½-pint to 3-pints per acre prior to planting or after planting.
4. Accord® may be mixed with WILBUR-ELLIS AMINE 4 to increase weed control.
5. 2 quarts or more of WILBUR-ELLIS R-11® SPREADER-ACTIVATOR per 100 gallons of spray solution may be added to improve herbicide performance.
