LO-CHEM TREATMENT M-20

FOR CONTROL OF BACTERIA AND ALGAE

ACTIVE INGREDIENTS:

Tributyltin Neodecanoate	5.0%
Alkyl* Dimethyl Benzyl Ammonium Chloride	12.5%
INERT INGREDIENTS:	82.5%
Total	100.0%

*60%C₁₄, 30%C₁₆, 5%C₁₂, 5%C_{8,10,18}

USDA Reg. No. 2938-5

DIRECTIONS FOR USE

Lo-Chem M-20 is intended for the control of algae and slime-forming bacteria in industrial, non-potable water systems only. For bacteria and algae control in recirculating water systems, dosage normally varies from 20 to 200 ppm, depending on severity of microbiological contamination. This is about 3 to

30 fluid ounces of M-20 per 1,000 gallons of water in the system. Repeat periodically until control is evident. Reuse is dependent on extent of re-growth; when growths are visible, reslug at same dosage. Pour slowly into the sump of the cooling tower.

CAUTION: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. May be absorbed through skin. Causes skin irritation. Avoid breathing spray mist. Do not get in eyes, on skin or on clothing.

In case of skin contact, remove contaminated clothing and immediately wash skin with soap and water. For eye contact, immediately flush with plenty of water. If irritation persists, get medical attention. Wash contaminated clothing before reuse.

Avoid storage near feed and food products. Do not use in potable water supplies.
