WASHINGTON, DC 20460

OFFICE OF CHEMICAL SAFETY  
AND POLLUTION PREVENTION

May 13, 2016

Leigh Anne Richardson  
Manager – Regulatory Administration  
Koppers Performance Chemicals  
1016 Everee Inn Road  
Griffin, GA 30224

Subject: Notification per PRN 98-10 – Add drums to container handling  
Product Name: CMC -10.3 Wood Preservative  
EPA Registration Number: 3008-102  
Application Date: May 13, 2016  
Decision Number: 516695

Dear Ms. Richardson:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Antimicrobials Division (AD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, you may contact Tom Luminello at (703) 308-8075 or via email at [luminello.tom@epa.gov](mailto:luminello.tom@epa.gov).

Sincerely,

A handwritten signature in blue ink that reads "Tom Luminello".

for  
Jacquie Hardy, Product Manager 34  
Regulatory Management Branch II  
Antimicrobials Division (7510P)

Enclosure –Stamped Label

## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Harmful if inhaled. Avoid contact with eyes, skin, or clothing. Avoid breathing spray mist or vapor.

#### PERSONAL PROTECTION EQUIPMENT (PPE)

Mixers, loaders, applicators, and other handlers (including persons handling treated wood) must wear the following:

- Long-sleeve shirt
- Long pants or coveralls
- Chemical resistant footwear made of any waterproof material, such as polyvinyl chloride, nitrile rubber, or butyl rubber, plus socks
- Goggles or face shield
- Chemical resistant gloves made of any waterproof material, such as polyvinyl chloride, nitrile rubber, or butyl rubber.

Chemical resistant gloves must be worn in all situations where dermal contact is expected (i.e. handling freshly treated wood, manual operation of treating cylinder/hatches, etc.).

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them. Wash the outside of gloves before removing.

Protective clothing must be replaced when it shows signs of contamination. Applicator must leave all protective clothing, work shoes or boots, and equipment at the treatment plant. Work out or severely contaminated protective clothing must be disposed of in a manner approved for pesticide disposal and in accordance with state and federal regulations.

#### USER SAFETY REQUIREMENTS

Users must wash hands before eating, drinking, using tobacco, or using the toilet. Users must remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users must remove personal protective equipment immediately after handling this product. Wash the outside of gloves before removing. As soon as possible wash thoroughly and change into clean clothing.

#### SAFE HANDLING PROCEDURES

Do not attempt to use without implementing the necessary safety equipment. Applicators must not eat, drink, or use tobacco products during those parts of the application process that may expose them to the wood treatment concentrate or solutions (i.e. manually opening/closing cylinder doors, shoving trams out of the cylinder, mixing chemicals, handling freshly treated wood, etc.)

Individuals who enter treatment cylinders and other related equipment contaminated with wood treatment solutions must wear protective clothing, (including overalls, jacket, gloves, and boots), impervious to wood treatment solutions. In addition, individuals who enter treatment cylinders must wear properly fitting, well-maintained, high efficiency respirators that are MSHANIOSH-approved for ammonia. If level of ammonia in the plant is unknown or exceeds 35 ppm (STEL) or 25 ppm (ACGIH) of air averaged over an 8-hour work period, air monitoring programs, procedures, and record retention and submission must be conducted in accordance with OSHA Standards.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates and may contaminate water through runoff. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment authority. For guidance, contact your State Water Board or Regional Office of the EPA.

# CMC 10.3

## Wood Preservative

Monoethanolamine Complex of Copper Carbonate  
For the control of wood damaging fungi and insects

#### ACTIVE INGREDIENTS:

Copper Carbonate\*(CAS #12069-69-1).....17.94%

INERT INGREDIENTS.....82.06%

TOTAL.....100.00%

\*Metallic Copper Equivalent – 10.31%

## KEEP OUT OF REACH OF CHILDREN CAUTION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

#### FIRST AID

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**Have the container or label with you when calling a poison control center or doctor, or going for treatment.**

EPA Reg. No. 3008-102

EPA Est. No. 3008-TN-1

Manufactured by:

Koppers Performance Chemicals Inc.  
1016 Everree Inn Rd.  
Griffin, GA 30224

#### NOTIFICATION

3008-102

The applicant has certified that no changes, other than those required by the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

05/13/2016

## DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

#### GENERAL INFORMATION

Use CMC 10.3 to control all types of fungal decay of wood products - brown, white, and soft rot and wood eating insects, including termites. CMC 10.3 should be used to treat any wood product that will be exposed to conditions favorable to rot, decay, or insect attack both above and in ground, or water. Types of products include lumber, timbers, landscape ties, fence posts, building and utility poles, land, freshwater and marine piling, sea walls, decking, and wood shingles.

Tank mix CMC 10.3 with quaternary ammonium compounds approved for wood treatment. Apply the tank mix solution by pressure impregnation. Follow the mixing instructions in the appropriate "Solution Mixing Table for CMC 10.3 Wood Preservative (2 component)", for obtaining the desired solution concentration. The percent solution to be used should be based on the retention, in lbs. per cubic foot (pcf), specified by the purchaser and by the treating process used.

A 3% solution can be used to field coat the cut ends of pressure treated wood by brush-on application.

## STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep from freezing (above 40°F) in a tightly closed container. Store in a cool dry area.

#### PESTICIDE DISPOSAL:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office of guidance.

#### CONTAINER DISPOSAL:

**DRUMS:** Nonrefillable container. Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning, it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state.

**Residue Removal:** Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Fill with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat the procedure two more times. Offer for reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

**TOTES:** Nonrefillable container. Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state. Empty tote container must be returned to a tote collection agent.

**Residue Removal:** Cleaning the container before final disposal is the responsibility of the person disposing of the container. To clean the container for final disposal, empty the remaining contents from the container into the mix tank. Fill the container about 10 percent full with water. Recirculate water with the pump for two minutes. Then add the rinsate to a rinsate collection system or to the mix tank as diluents. Repeat this rinsing procedure two more times. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
