OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

July 9, 2021

Leigh Ann Richardson
Koppers Performance Chemicals Inc.
1016 Everee Inn Road
Griffin, GA 30224

Subject: Label Amendment – Add additional application methods such as dip, spray, and coating processes (brush). Also, add the statement “Wood treated with this product cannot be used to construct beehives”.

Product Name: ORD-X123
EPA Registration Number: 3008-111
Received Date: Sept. 21, 2020
Action Case Number/Decision Number: 00217669

Dear Ms. Richardson:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6) you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. “To distribute or sell” is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the

EPA Reg. No. 3008-111
Action Case Number/Decision No. 00217669

EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Srinivas Gowda by phone at 703-308-6354, or via email at gowda.srinivas@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Jacqueline Hardy". The signature is written in a cursive, flowing style.

Jacqueline Hardy, Chief
Regulatory Management Branch II
Antimicrobials Division (7510P)
Office of Pesticide Programs

Enclosures: Label stamped "Accepted"

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed or absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE): Mixers, loaders and applicators and other handlers must wear:

- Coveralls over long-sleeved shirt and long pants,
- Socks and chemical resistant footwear,
- Protective eyewear, such as goggles or face shield,
- Chemical-resistant apron, and
- Chemical-resistant gloves (such as Barrier Laminate or Butyl Rubber, Selection Category B).

USER SAFETY REQUIREMENTS: Protective clothing must be changed when it shows signs of contamination. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbant materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.

Applicators must not eat or drink or use tobacco products during those parts of the application process that may expose them to the wood treatment formulation (e.g., manually opening/closing cylinder doors, moving trams out of cylinders, chemicals, handling freshly treated wood).

USER SAFETY RECOMMENDATIONS: User must wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User must remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users must remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and shrimp. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) Permit and the Permitting Authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

ORD-X123

ANTIMICROBIAL – WOOD PRESERVATIVE

ACTIVE INGREDIENTS:

Propiconazole	10.0%
Tebuconazole.....	10.0%
Imidacloprid.....	1.0%
OTHER INGREDIENTS	79.0%
TOTAL.....	100.0%

KEEP OUT OF REACH OF CHILDREN DANGER

FIRST AID

IF IN EYES: Hold eye(s) open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue to rinse eye(s). Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably mouth-to-mouth Call a Poison Control Center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. No specific antidote is available. Treat symptomatically.

HOT LINE NUMBER: In case of emergency, call CHEMTREC toll free at 800-424-9300. Have the product container or label with you when calling a poison control center or doctor or going for treatment.

SEE LEFT PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ORD-X123 will control all types of fungal decay of wood products - brown, white, and soft rot, and wood destroying insects. This product may be mixed with other products that are approved by EPA for wood treatment. Apply the dilute solution to wood products by dip, brush, spray, or vacuum pressure. Apply ORD-X123 to wood products that will be exposed to conditions favorable to rot, decay or insect attack in above ground applications only.

Dip, Brush, or Spray: Dilute ORD-X123 with water, surfactants, defoamers, or polymers to solutions having concentrations ranging from 0.30% to 1.0% total active ingredients by weight. To prepare a 1,000-gallon solution containing 0.8% total actives, combine 960.7 gallons of water and 39.3 gallons on ORD-X123. For other treating solution strength scenarios, adjust the ORD-X123 concentration to meet the desired active ingredient levels. Water, surfactants, defoamers, or polymers will make up the difference. When dipping, totally submerge the wood in the diluted solution up to 15 minutes at ambient condition and then allow to dry in a suitable location. Dipping compositions must be agitated if left unused for a period of time, such as overnight. When spraying or brushing, coat the wood thoroughly, including backs and end.

Vacuum Pressure: Dilute ORD-X123 with water to solutions having concentrations ranging from 0.005% to 0.1575% total active ingredients by weight. To prepare a 1,000-gallon solution containing 0.07% total actives, combine 996.53 gallons of water and 3.47 gallons on ORD-X123. For other treating solution strength scenarios, adjust the ORD-X123 concentration to meet the desired active ingredient levels. Water will make up the difference.

The below table represents the uses/commodities, maximum application rates, minimum retention in pounds per cubic foot (pcf) of each active ingredient, and minimum total active retention for each use/commodity category.

Uses/ Commodities	Maximum Application Rates		Minimum Active Ingredient Retention		Minimum Total Active Retention (pcf)
	Propiconazole and Tebuconazole (%)	Imidacloprid (%)	Propiconazole and Tebuconazole (pcf)	Imidacloprid (pcf)	
Interior/ Above Ground Protected (coated millwork, siding, framing)	0.10	0.0050	0.01238	0.00062	0.013
Above Ground Exposed (decking, sills, walkways, railings, fence pickets)	0.15	0.0075	0.01714	0.00086	0.018

Wood treated with this product cannot be used to construct beehives.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in cool, dry place. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these pesticides cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING:

Drums: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat the procedure two more times. Offer for reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Totes: Nonrefillable container. Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning, it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state. Empty tote container must be returned to a tote collection agent or to the manufacturer. Residue Removal – Cleaning container before final disposal is the responsibility of the person disposing of the container. To clean container before final disposal, fill container about 10 percent full with water; agitate container vigorously; discard rinsate according to pesticide disposal instructions; repeat this rinsing procedure two more times. For additional container disposal information, contact product supplier.
