PINE OIL DISINFECTANT  
PHENOL COEFFICIENT 5 A.O.A.C. METHOD

ACTIVE INGREDIENTS:	
Steam Distilled Pine Oil	80.0%
Soap (Anhydrous)	10.0%
INERT INGREDIENTS:	
Water	10.0%
Total	100.00%

#### DIRECTIONS FOR USE

##### GENERAL PREMISE DISINFECTING:

Remove all filth and dirt from the premises and use a solution of one part disinfectant to 100 parts of water. This mixture acts as a disinfectant against the S. Typhosa germ. Thoroughly wet all treated surfaces.

**FLOORS:** When mopping or scrubbing use  $1\frac{1}{2}$  ounces disinfectant to each gallon of water in the bucket.

**TOILET ROOMS, WATER CLOSETS and URINALS:** Wash the closet and urinal bowls regularly with a solution of  $1\frac{1}{2}$  ounces of Disinfectant in each gallon of water, leaving the solution in the bowl as long as possible. Scrub the floor and seat frequently with this solution.

**GARBAGE:** To aid in preventing the breeding of flies and certain other vermin, sprinkle with the solution in the proportion of  $1\frac{1}{2}$  ounces of Disinfectant to each gallon of water. Rinse the empty can with some of the solution and leave the wash in the can.

**SICKROOM:** In the disinfecting of beds, clothes, utensils and rooms, Disinfectant should be used in the proportion of 3 ounces in each gallon of water.

**CUSPIDORS:** A solution of  $2\frac{1}{2}$  ounces of Disinfectant to a gallon of water will aid in deodorizing and disinfecting cuspidors. Leave this mixture standing in the cuspidors. Always put Disinfectant in pail first and then add the water.

**CAUTION:** KEEP OUT OF REACH OF CHILDREN
