## QUIK-TROL

A Food Processing Plant Contact Insecticide  
EPA: Reg. No. 3050-14

### DIRECTIONS

**FLIES, BEETLES, FLIES and MOSQUITOES** - Clear all rooms and windows. Direct spray against insects from a distance of 10 to 20 feet. Keep insects for 10 to 20 minutes. Wash and destroy all insects. Dried fly eggs may be necessary.  
**CRACKS, REACHES, SILVERFISH and BATH STUBS** - Spray thoroughly into all cracks, crevices and crevices where insects apply. Particularly watch areas where insects hide such as drains, sinks and water pipes. Whenever possible spray on insect as they emerge from hiding places. Repeat application as necessary.  
**ANTS** - Spray directly into nest, along ways, and directly on ants about the nest as frequent as necessary.
