DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DO NOT USE THIS PRODUCT IN OR ON ELECTRICAL EQUIPMENT DUE TO THE POSSIBILITY OF SHOCK HAZARD.

General: This Product has been specifically designed for indoor and outdoor use in, aroung the perimeter of, and out: le of poultry houses and poultry processing plants. For use undiluted or diluted with water and applied as a space spray with cold aerosol generators (ULV), automatic spraying systems, and hand held mechanical foggers or misters. Also for use undiluted or diluted with water and applied as a wet surface spray with mechanical misting equipment or compressed air sprayers.

Official establishments operating under the Federal Meat, Poultry, Shell Egg Grading, and Egg Products Inspection Program: Before using this product, exposed food products and packaging materials must be removed or protected. After using this product, facilities, equipment, and utensils must be washed with an effective cleaning compound and thoroughly rinsed with potable water after spraying. Before food products may be placed back into the area where this product has been used, the area should be sufficiently free of odor to prevent product contamination. Do not apply while food processing is underway. When applied as a surface spray, this product must be diluted 1 part concentrate to 29 or more parts water. When applied as a mist or aerosol spray, this product must be diluted 1 part concentrate to 5 or more parts water.

This product should be used in, around the perimeter of, and outside of poultry houses and poultry processing plants as a space or surface spray for the control of, but not limited to, exposed stages of the following insects:

Ants, Hornets, Brown Dog Ticks, Horn Flies, Cockroaches, Horse Flies, Crickets, House Flies, Darkling Beetles, Lice, Deer Flies, Mites, Earwigs, Mosquitoes, Face Flies, Silverfish, Fannia Flies, Scorpions, Firebrats, Small Flying Moths, Fleas, Spiders, Flies, Stored Product Moths, Fruit Flies, Wasps, Fungus Gnats, Yellow Jackets, and other similar insects.

Dilution Instructions:

Dilute this product just prior to use as follows:

0.500% Pyrethrins - Add 1 part Concentrate to 5 parts water.

0.100% Pyrethrins - Add 1 part Concentrate to 29 parts water.

0.056% Pyrethrins - Add 1 part Concentrate to 54 parts water.

INDOOR USE

Space Spray Application

In poultry houses, poultry processing plants, and poultry ranch equipment and tool sheds as a space spray, undiluted or diluted and applied with conventional ULV cold aerosol generators, automatic spraying systems, and hand held mechanical foggers or misters, for the control of, but not limited to, exposed stages of the following insects:

Ants, Hornets, Brown Dog Ticks, Horn Flies, Cockroaches, Horse Flies, Crickets, House Flies, Darkling Beetles, Lice, Deer Flies, Mites, Earwigs, Mosquitoes, Face Flies, Silverfish, Fancia Flies, Scorpions, Firebrats, Small Flying Moths, Fleas, Spiders, Flies, Stored Product Moths, Fruit Flies, Wasps, Fungus Gnats, Yellow Jackets, and other similar insects.

Whenever possible, space spray application should be made in the late evening when insects are at rest. Use a conventional ULV cold aerosol generator, thermal fogger, or fogger adjusted to deliver aerosol size droplets. Close poultry house as tightly as possible. Apply at a rate of 1-2 ounces per 1000 cubic feet of space above the birds. Dire is spray toward the upper portions of the enclosure above the birds, filling the barn with mist or fog. For best results, keep area closed for at least 25-30 minutes after treatment. Vacate treated area and ventilate before reentering. Repeat treatment if infestation reoccurs.

OUTDOOR USE

Space Spray Application

For use outside of and around the perimeter of poultry houses, poultry processing plants, and poultry ranch equipment and tool sheds as a space spray, undiluted or diluted and applied with conventional ULV cold aerosol generators, automatic spraying systems, and hand held mechanical foggers or misters, for the control of, but not limited to, exposed stages of the following insects:

Ants, Hornets, Brown Dog Ticks, Horn Flies, Cockroaches, Horse Flies, Crickets, House Flies, Darkling Beetles, Lice, Deer Flies, Mites, Earwigs, Mosquitoes, Face Flies, Silverfish, Fannia Flies, Scorpions, Firebrats, Small Flying Moths, Fleas, Spiders, Flies, Stored Product Moths, Fruit Flies, Wasps, Fungus Gnats, Yellow Jackets, and other similar insects.

Whenever possible, space spray application should be made in the late evening when insects are at rest. Apply when there is a light breeze approximately 5 miles per hour. Spray from the windward side so the mist or fog will be carried across the area to be treated. Outside treatment includes, but is not limited to, such areas as undersides of eaves, around farm equipment, above and around exposed manure piles, in and around shrubbery and vegetation, stagnant pools, marshy areas and other similar places where insects may rest or hide. Apply at a rate of 1-2 ounces per 1000 cubic feet. Repeat treatment if infestation reoccurs.

INDOOR/OUTDOOR USE

Surface Spray Application for Crawling Insects

For use as a surface spray, undiluted or diluted and applied with mechanical misting equipment or compressed air sprayers in, around the perimeter of, and outside of

1.:7

poultry houses, poultry processing plants, and poultry ranch equipment and tool sheds for the control of, but not limited to, exposed stages of the following crawling insects:

Ants, Brown Dog Ticks, Cockroaches, Crickets, Darkling Beetles, Lice, Mites, Earwigs, Silverfish, Scorpions, Firebrats, Fleas, Spiders, and other similar insects.

Apply as a coarse, wet surface spray including, but not limited to such areas as trails, harborage areas, interior walls, exterior walls, nests, points of entry, dumpsters, tool sheds, gate houses, cracks and crevices, ranch equipment, beams, trash cans, cellings, behind equipment, moldings, doors, around window frames, undersides of eaves, rafters, foundations, tractors, electric carts, manure piles, poultry hauling equipment, building foundations and similar insect hiding places. Spray liberally contacting as many insects as possible. Repeat treatment if infestation reoccurs.

Surface Spray Application for Resting Flying Insects

For use as a surface spray, undiluted or diluted and applied with mechanical misting equipment or compressed air sprayers in, around the perimeter of, and outside of poultry houses, poultry processing plants, and poultry ranch equipment and tool sheds for the control of, but not limited to, exposed stages of the following resting flying insects:

Hornets, Horn Files, Horse Files, House Files, Deer Files, Mosquitoes, Face Files, Fannia Files, Small Flying Moths, Files, Stored Product Moths, Fruit Files, Wasps, Fungus Gnats, Yellow Jackets, and other similar insects.

Whenever possible, surface application should be made in late evening when insects are at rest. Apply as a coarse, wet surface spray including, but not limited to such areas as trails, harborage areas, interior walls, exterior walls, nests, points of entry, dumpsters, tool sheds, gate houses, cracks and crevices, ranch equipment, beams, trash cans, ceilings, behind equipment, moldings, doors, around window frames, undersides of eaves, rafters, foundations, tractors, electric carts, manure piles, poultry hauling equipment, building foundations, and similar insect hiding places. Spray liberative contacting as many insects as possible. Repeat treatment if infestation reoccurs.

WARRANTY STATEMENT: Our recommendations for use of this product are based upon tests believed to be reliable. The use of this product is beyond the control of the manufacturer. No guarantee, expressed or implied, is made as to the effect of such or the results to be obtained if not used in accordance with the directions or established safe practice. The buyer must assume all responsibility, including inlury or demaye, resulting from its misuse as such or in combination with other materials.
