DISINFECTANT DETERGENT

SOUTHWESTERN PETROLEUM'S ANSWER TO THE PROBLEM OF DISINFECTION

Due to the many strains of bacteria which can cause infection, it has been necessary for those firms requiring periodic disinfection to stock and use a wide variety of germicides and disinfectants. In addition, ordinary cleaning and removal of dirt, grease, and grime was a separate problem. Because of this, disinfection for hospitals, clinics, and similar institutions has been confusing, time-consuming and costly.

A WIDE-SPECTRUM DISINFECTANT

Now, SWEPACO DISINFECTANT DETERGENT provides in one product "wide spectrum" cleaning and disinfecting benefits. DISINFECTANT DETERGENT has been designated a "wide spectrum" disinfectant because it provides disinfecting benefits against a wide range of bacteria, including certain strains which resist PENICILLIN, STREPTOMYCIN, and TETRACYCLINE.

PHENOLIC TYPE IS ONE OF THE MOST EFFECTIVE

In the earliest days of research in the field of germicides and disinfectants carbolic acid was used. Since that time numerous compounds have been developed and used with varying degrees of success. Some were too limited in effectiveness, some were unstable and dangerous. There are five basic types of disinfecting agents commonly in use today. Of these, some of the most effective are the ones derived from the basic compound, PHENOL. Among the thousands of phenolic derivatives possible, however, only a few have gained commercial acceptance. Working with the most effective of phenolics, the Research and Development Laboratories of Southwestern Petroleum developed SWEPACO DISINFECTANT DETERGENT, an effective "wide-spectrum" disinfectant.

GERMICIDE-FUNGICIDE-TUBERCULOCIDE -CLEANER-DEODORIZER

SWEPACO DISINFECTANT DETERGENT is effective not only as a germicide, but also as a fungicide, tuberculocide, cleaner, and deodorizer. In one product then, you have five economical benefits. As a cleaner, SWEPACO DISINFECTANT DETERGENT penetrates, lifts, and floats away dirt and grime WHILE IT KILLS MOST DISEASE AND ODOR-PRODUCING GERMS! It leaves no surface film, and is safe to use on many surfaces or areas requiring disinfection or cleaning. Floors, walls, basins, woodwork, restrooms, locker rooms, and shower stalls are examples of the types of surfaces intended for treatment.

SIMPLE, QUICK, AND EASY TO USE

Simply add one ounce of SWEPACO DISINFECTANT DETERGENT to a gallon of warm water and you have a power-packed solution that is ready to go to work immediately. No special equipment is required for mixing. It is easily applied with mop, brush, or spray. It will fit right into your present cleaning operations. You'll find that whatever system you are using presently, SWEPACO DISINFECTANT DETERGENT will cost less and disinfect and clean more efficiently. Just one gallon of SWEPACO DISINFECTANT DETERGENT in its concentrated form will provide 128 gallons of "wide spectrum" disinfectant solution.
