

CONTENTS:
3 lbs. NET WEIGHT

ACTIVE INGREDIENTS	
Dichlorodiphenyl Trichloroethane (DDT)	38%
D, M Propyl Maleate isosafrole compound	2.8%
Pyrethrin	2%
Isol	100%
INERT INGREDIENTS	
Dichlorodifluoromethane (Freon 12)	64%

PRECAUTIONS

The user shall not be held responsible for injury whether used according to directions or not. Buyer accepts and uses this material subject to terms.

- AVOID EXCESSIVE INHALATION OF VAPOUR
- AVOID DIRECT CONTACT WITH SKIN
- DO NOT USE ON MAN OR ANIMAL
- REMOVE BABIES, CANARIES, GOLDFISH AND OTHER HOUSEHOLD PETS BEFORE SPRAYING
- TO AVOID STAINING DO NOT HOLD NOZZLE CLOSER THAN 36 INCHES TO OBJECTS BEING SPRAYED
- AVOID CONTAMINATION OF FOOD STUFFS

ANTIDOTE

EXTERNAL—Wash with warm water and soap
INTERNAL—Emetic of Mustard

CAUTION

Do not use on dairy animals, on forage crops to be fed dairy animals or those being finished for slaughter, or as a residual spray in dairy barns. When in solution DDT is toxic and can be absorbed in skin.

Manufactured by

JASGO Chemical Company

A pressurized, concentrated insecticide for use in Clothing, Fur, Knitwear, Warehouse, Rug and Carpet flooring establishments, etc.
"WIFF" Wonder Bomb spray is Non-Inflammable

IMPORTANT

Screw spray valve straight into place. Then the valve must be tightened firmly. Remove valve to clean when necessary.

DIRECTIONS FOR USE

SPACE SPRAY—Close doors and windows. Direct nozzle toward ceiling and walk slowly around room. Spray 4 seconds per 1000 cubic feet. This is usually sufficient to kill most flying insects such as flies, mosquitoes, gnats, flying moths and the like. Keep room closed 10 minutes.

DIRECT APPLICATION—Close doors and windows. To control crawling insects such as roaches, ants, and silverfish, direct spray at baseboards, moldings, cracks and crevices, cupboards, and around pipes. Nozzle should be held at more than 18 inches away. Operator should walk slowly around infested area making bomb in a paint spray motion. Spray at least 10 seconds per 100 sq. feet of floor space.

FOR CONTROL OF CARPET BEETLES—Use as above and in addition treat floor covering and cracks in floor.

FOR FLEAS—Treat sleeping quarters of pets in addition to above directions, under crawling insects.

FOR BEDBUGS—Thorough spraying of bed and mattress is required in addition to above directions.

FOR CONTROL OF MOTHS—All articles should be sprayed with nozzle held at a distance of 3 feet to prevent staining. Use care. Do not wet fabric, etc. Attention should be given to seams and folds. Complete coverage is required. Interior surfaces of storage containers such as closets or trunks should be thoroughly sprayed. Repeat application at monthly intervals unless moth proof containers are used.

CAUTION

This cylinder contains a liquid under pressure. Do not drop the cylinder or expose it to temperatures higher than 130° F.
