

## WARNING

May be fatal if swallowed, inhaled, or absorbed through the skin. Rapidly absorbed through the skin. Do not get in eyes, on skin, or on clothing. Do not breathe spray mist. Wash thoroughly with soap and warm water after handling. Wash clothing with soap and hot water before re-use.

Avoid contamination of feed, food, or food-handling equipment. If food-handling equipment becomes contaminated, clean thoroughly before reuse. Keep out of reach of children.

**ANTIDOTE:** Administer atropine sulfate in large therapeutic doses. Repeat as necessary to the point of tolerance. 2-PAM is also antidotal and may be administered in conjunction with atropine.

## WARRANTY AND LIMITATION OF DAMAGES

Chemagro Corporation warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use and Conditions of Sale; subject to the risks referred to therein. Chemagro Corporation makes no other express or implied warranty, including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of Chemagro Corporation is authorized to do so except in writing, with a specific reference to this warranty. Any damages arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damages such as loss of profits or values, etc.

## RESTRICTIONS

Do not use as a space spray. Avoid excessive wetting of asphalt tile, rubber, and plastic materials.

Do not spray on plants.

Do not use in dairy barns or poultry houses.

Do not use in areas where children or pets can come into direct contact with treated surfaces.

Remove fish or other pets from room before spraying.

## PATENT LICENSE

The principal active ingredient of this product is patented under U.S. Patent No. 3,042,703 and Canadian Patent No. 631,472 of Chemagro Corporation, Kansas City, Missouri, and the purchase of this product includes a limited license under said patents to use or reformulate the product only in the manner provided by the recommended applications on the present label. The purchaser obligates itself to notify Chemagro Corporation of any proposed use or reformulation of such licensed product not provided by said recommended applications, and to obtain Chemagro's approval in writing before making any such use or reformulation of the licensed product. Any use, or reformulation intended for use, of the licensed product in the home or garden field, or animal health field, is specifically prohibited by said license.

ENTEX is Reg. TM in U.S. and Canadian Pat. Offs. by Farbenfabriken Bayer A.G. Chemagro Corporation licensee. 9-9061 766270

## DIRECTIONS FOR USE

**IMPORTANT:** Read these entire Directions and Conditions of Sale, including the Warranty and Limitation of Damages provision, before using ENTEX Oil Soluble Concentrate.

**CONDITIONS OF SALE:** These Directions for Use reflect the opinion of experts based on tests of effectiveness, of toxicity to plants and laboratory animals and of residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller. Chemagro Corporation and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

ENTEX Oil Soluble Concentrate is recommended for residual control of cockroaches (waterbugs), ants, fleas (outdoors), mosquitoes, flies, crickets, and wasps which are a problem in and around the home and other buildings such as restaurants, stores, warehouses and industrial structures.

Mix 3 to 5 fluid ounces of the oil soluble concentrate in 1 gallon of deodorized insecticide base oil for application to approximately 500 square feet of area or to run-off. Use the higher concentration for the initial treatment or for heavy cockroach infestations. For subsequent periodic applications and for control of flies and mosquitoes, use the lower dosage.

### In Meat Packing and Food Processing Plants:

Apply as a coarse spray or with a paint brush to walls, ceilings, and other infested areas. Use only in the inedible products areas of meat and poultry processing plants. Any exposed food products, equipment or packaging materials must be removed or covered before treatment. After treatment, equipment and utensils must be thoroughly rinsed with

## DIRECTIONS FOR USE

(Continued)

water before resuming operations. Treat food processing plants early in the season before canning or other processing begins. Repeat applications, if necessary, when plant is not in operation.

Spraying unloading docks and outside areas where insects congregate will aid in preventing re-infestations. Good sanitation and proper disposal of wastes are essential in any effective insect control program.

### Inside Buildings:

Application should be made as a coarse spray or with a paint brush to baseboards, cracks, crevices, and other insect hiding places. Also apply to adjacent exposed surfaces where the insects will crawl when they come out of hiding. Heavy sprays may cause staining.

### Exterior Use:

Apply as a coarse spray or with a paint brush to selected surfaces such as doors, screens, window frames, door sills, and areas of porches or patios where these insects alight or congregate. Apply to the nest of wasps after dark when all of the insects have returned to the nest. Apply localized treatments to infestations of ants and fleas in outdoor areas where there is no vegetation. For ants, thoroughly wet hills and runways. Repeat as necessary to maintain effective control.

### MIXING CHART:

Concentration of ENTEX Required	Fluid Ounces of ENTEX Oil Soluble Concentrate to Add to:		
	1 Gallon	3 Gallons	10 Gallons
1.5 %	3	9	30
2.25 %	5	15	50
