BEFORE USE

CHEMAGRO

Chemagro Corp., 10000 W. 10th St., Omaha, Nebraska 68147

IMPORTANT: Read these instructions, the Conditions of Sale, including the Terms and Limitation of Damages, and the label on the DYRENE 3% Granular.

CONDITIONS OF SALE: This product may not reflect the opinion of Chemagro Corp. as to its effectiveness, toxicity to plants, and safety to animals under normal conditions of use, because of the wide range of conditions under which this product may be used. Use in any other directions are forbidden. Chemagro Corp. and its officials associated with it assume no liability for conditions beyond those specified on the label of Chemagro and the label attached to this product, and the label attached to this product is subject to the terms and conditions of any sales agreement that may be made as in such case.

DYRENE 3% Granular turf fungicide effectively protects grasses from various diseases. Uniform distribution of granular material is necessary for maximum control. For a preventive program, begin applications before disease appears and repeat treatments as needed, usually at intervals of 10 to 14 days, except during extended periods of unfavorable conditions, when applications should be made as feasible. Applications should be made during the spring and summer months.

For control of *Typhula* snow mold on lawns, apply 3% Granular at lower seed rate after the first fall frost in the fall. A second treatment should be made when the lawn is free of snow in the winter and the snow should be footed down in the spring after the final melting of snow. For control of *Pyrenopeziza* and *Dothidea*.

RECOMMENDED APPLICATIONS

CROP	DISEASE	Application Rate (lb./1000 sq. ft.)
Lawns	Brown patch	1.0
	Cyber spot	1.0
	Fairy spot	1.0
	Leaf spot	1.0
	Red thread	1.0
Tennis courts	Leaf spot	1.0
	Red thread	1.0
