

# SUPPLEMENTAL LABELING

ACCEPTED

JUL 14 1978

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, the pesticide registered under EPA Reg. No. 3125-117

® MORESTAN 25% WETTABLE POWDER  
MITICIDE - FUNGICIDE  
EPA Reg. No. 3125-117-AA

### RECOMMENDED APPLICATIONS

CROP	PEST	Pounds MORESTAN 25% WP	REMARKS
<b>BEARING FRUIT</b>			
Pre-Bloom & Post-Harvest Apples Pears	Powdery Mildew (see NOTE in Remarks) Mites Mites eggs	¼ to 1	Apply specified dosage per 100 gallons of water in pre-bloom sprays (delayed dormant, pre-pink, or pink). Do not apply after first bloom. Additional applications may be made to tree foliage after harvest. NOTE: Pre-bloom sprays with MORESTAN 25% W.P. will provide effective control of early season powdery mildew infections. No additional fungicides are needed for powdery mildew control during the pre-bloom period. Use other recommended fungicides in post-bloom spray programs for seasonal control.
	Pear psylla	1-½	

**IMPORTANT:** This supplemental labeling is not intended to provide full information for use of this product. Before using MORESTAN 25% Wettable Powder, read and carefully observe caution statements, directions for use, restrictions and disposal information on the label.
