Reason to Issue: To include additional indoor sites of applications.

Date of Draft: 6/10/88 (Pre-Reg) (S)

EPA Reg. No. 3125-121

BAYGON®

2% Bait

INSECTICIDE

ACTIVE INGREDIENT:

2-(1-Methylethoxy)phenol

methylcarbamate 2%

AMENDMENT

To Previously Registered Labeling

Revise as Follows:

BAYGON 2% Bait insecticide, a ready-to-use product, is very effective for the control of ants (except California), crickets and the following cockroaches listed below. It gives rapid kill of these insects including those resistant to certain chlorinated hydrocarbon and phosphate insecticides. Crickets and roaches die quickly after feeding on the bait. Apply as needed to control the target pests.

Cockroaches: American, Brown, Brown banded, German, and oriental roaches.

Crickets

Ants (including carpenter ants) (except California)

For Use in and around Homes, Apartment Buildings, Stores, Restaurants (non-food areas), Warehouses, Government Offices, Public Buildings and Institutions.

Apply bait lightly to floors near baseboards, in closets, under sinks and refrigerators, around and inside garbage cans, and in other areas where insects are found but which are inaccessible to children such as cracks and crevices. Do not apply to animals. Do not treat portions of buildings where animals can feed on bait. Use approximately 4 ounces of bait per 1,000 sq. ft. of space and scatter lightly so that bait is barely visible. Repeat as necessary. Keep out of reach of children.

For Use By Pest Control Operators in Restaurants (food areas), Poultry Packing, Red Meat Packing and Food Processing Plants, including plants that are Federally Inspected, as well as food processing areas of stores, warehouses, Government Offices, Public Buildings and Institutions.

Apply bait on paper, pasteboard, or other material that will permit removal. Locate these bait stations on window sills, on floor near walls, in storage areas and other areas where insects have been observed. Maintain strict account of location and number of bait stations. Do not apply bait in edible product areas until operations have ceased for the day. Remove all bait stations from the edible products areas before resuming operations.

NOTE: All copy except that which is underlined has been previously registered.
