THE FEDERAL INSECTICIDE  
ACT AND REGULATIONS  
AND PESTICIDE REGISTRATION  
NO. 31,250-49

**STOP—READ THE LABEL BEFORE USE**  
**DIRECTIONS FOR USE**

NEGUVON 80% Soluble Powder is completely soluble in water at the recommended concentration, and is readily usable in most conventional high pressure spray equipment.

**TIMING OF APPLICATIONS FOR CATTLE GRUB CONTROL:**

Treatment of cattle with NEGUVON 80% Soluble Powder can be made at any time during the grub season; however, most beneficial effects will be achieved by treating early in the grub cycle. Treat as soon as possible after activity of heel fly has ceased and preferably at least 6 weeks prior to expected appearance of grubs in the back. Treatments applied very near to or during the time grubs are appearing in the back will destroy the grubs, but considerable damage will have already occurred.

**CATTLE GRUB CONTROL:**

Cattle grub spray treatments should be applied in such a manner that the skin, not just the hair, becomes thoroughly wet. Spray pressures of 250 to 350 pounds are recommended. Operate box-type spray chutes at maximum pressure for thorough over-all wetting and penetration.

**HORN FLY AND LICE CONTROL:**

For control of horn flies and lice, repeat recommended applications when insects appear and constitute a problem.

**RECOMMENDED NEGUVON APPLICATIONS**

ANIMAL	PARASITE	Pounds NEGUVON 80%	REMARKS
Beef Cattle	Horn flies	10	SPRAY TREATMENT: Mix specified dosage in 100 gallons of water. Apply this solution for complete wetting to runoff. Repeat as necessary but not within 14 days of slaughter.
	Lice		
	Grubs		

**RESTRICTIONS**

Do not treat dairy animals, animals less than 3 months old, sick, convalescent, or stressed livestock.

Do not spray in a confined, non-ventilated area.

Do not apply in conjunction with oral remedies, other internal medications, or other organic phosphate sprays.

**PREMISE SPRAY**

For Fly Control in an Around Farm Buildings (Except Dairy Barns): Mix 5 pounds of NEGUVON 80% Soluble Powder in 40 gallons of water (equivalent of 5 level teaspoons per gallon). Thoroughly wet all areas to be treated by spraying 1 gallon per 100 square feet of surface area or to the point of runoff. Apply to floors, walls, ceilings, around windows, doors, and other areas where flies congregate. Also spray stock pens (after removal of animals), garbage areas, and other locations where refuse has collected. Repeat applications every 1 to 2 weeks or as fly populations increase. For longer residual control, add 1 pound of sugar to each gallon of NEGUVON spray solution.

**RESTRICTIONS (Premise Spray)**

Remove animals before spraying barn. Do not treat portions of buildings where poultry feed. Direct application to walls, floors or other surfaces previously treated with lime, whitewash, or other alkaline materials may be ineffective. Do not contaminate feed, water, or milk-handling equipment.

**WARNING**

May be poisonous if swallowed. Harmful if inhaled or absorbed through the skin. Do not get in eyes or on skin. Do not breathe dust or spray mist. Wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and hot water before re-use.

Do not contaminate feed or food. Keep out of reach of children.

If misuse results in accidental poisoning, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression.

To Physician—Atropine sulfate is antidotal.

**NOTICE**

Since the use of this product is beyond the manufacturer's control, neither Chemagro Corporation nor the seller makes any warranty expressed or implied concerning this material, whether used in accordance with directions or not, except that it conforms to the chemical composition expressed on the label when packaged. Neither Chemagro Corporation nor the seller shall be held responsible in any manner for any personal injury or property damage resulting from handling, storage, or use of this material. The buyer assumes all risks and liability therefrom and accepts and uses this material on these conditions.

**PATENT LICENSE**

The principal active ingredient of this product is patented under U.S. Patent No. 2,701,225 and Canadian Patent No. 529,379 of Chemagro Corporation, Kansas City, Missouri, and the purchase of this product includes a limited license under said patents to use or reformulate the product only in the manner provided by the recommended applications on the present label. The purchaser obligates itself to notify Chemagro Corporation of any proposed use or reformulation of such licensed product not provided by said recommended applications, and to obtain Chemagro's approval in writing before making any such use or reformulation of the licensed product.

**PREMISE SPRAY**

For Fly Control in any Animal Farm Buildings: Ex-  
treme areas where flies congregate. Also spray sto-  
cks, garbage areas, and other locations  
of animal manure. Repeat applications every 1 to 2 weeks  
for longer residual control, add 1 pound  
of NEGUVON spray solution.

**RESTRICTIONS (Premise S)**

Remove animals before spraying barn. Do not treat  
where poultry feed. Direct application to walls, floor  
vicinity treated with lime, whitewash, or other alk-  
aline solutions is ineffective. Do not contaminate feed, water, or manure.

**WARNING**

May be poisonous if swallowed. Harmful if inhaled  
or absorbed through the skin. Do not get in eyes or on skin. Do not breathe  
vapors. Wash thoroughly with soap and warm water after use. Con-  
taminated clothing with soap and hot water before reuse.  
Do not contaminate feed or food. Keep out of reach of children.  
If misuse results in accidental poisoning, obtain medical attention  
immediately. Prolonged exposure will result in cholinesterase  
inhibition. To Physician—Atropine sulfate is antidotal.

**NOTICE**

Since the use of this product is beyond the manufacturer's control,
